President of the State Board of Education, Mr. W. N. Neff (Ex-Officio).

DR. DOWELL J. HOWARD

On February 23, 1957, public education suffered a great loss in the death of Dr. Dowell J. Howard, Superintendent of Public Instruction.

In recognition of the fine service and outstanding contribution made by Dr. Howard, the following resolution was adopted by the State Board of Education:

WHEREAS, the members of this Board learned of the sudden passing of Dowell J. Howard, Superintendent of Public Instruction of the State of Virginia, on Saturday, February 23, 1957, and this tragic news brought a deep sense of shock and sorrow to each individual member; and

WHEREAS, the State of Virginia has lost a great, dedicated, conscientious, and able Superintendent of Public Instruction, who has contributed greatly to the cause of public education under the most difficult and trying conditions, and each individual member of this Board, and the whole staff of the State Department of Education and the Colleges under the supervision of this Board, have lost a warm, sincere, and able friend and a most companionable associate; and

WHEREAS, the wife of Dowell Howard, his son, Dowell J. Howard, Jr., and his daughter, Mrs. William Parrish, have lost a husband and a father of great loyalty and devotion, whose life has been cut short in the wisdom of Providence long before his useful talents and happy life should ordinarily end:

THEREFORE, be it unanimously resolved by the State Board of Education that it hereby record its feeling of great loss in the passing of an unusually able, dedicated, and effective public servant; and be it

FURTHER RESOLVED, That this Board express to the family of Dowell J. Howard its sympathy in their loss and the fact that this Board keenly shares that loss with them; and be it

FURTHER RESOLVED, That a copy of this action be recorded in the Minutes of the meeting of this Board and that copies be sent to his wife, to his son, and to his daughter, that they may each have a record of this action of the Board.

APPOINTMENT OF DR. DAVIS Y. PASCHALL

On March 12, 1957, The Honorable Thomas B. Stanley, Governor of Virginia, appointed Dr. Davis Y. Paschall to the position of Superintendent of Public Instruction for the unexpired term.

In acceptance of the appointment, Dr. Paschall made the following statement:

In acceptance of this appointment, I am overwhelmed by a deep sense of humility. It was my high privilege to know and work closely with Dr. Dowell Howard for the past ten years. His integrity, devotion to duty, and outstanding contribution to education are increasingly felt under the sustained impact of his untimely passing.

I subscribe to the belief he held that we must constantly stress the fundamentals as the foundation of education. Those students planning to enter college should receive proper preparation for such entrance, and those leaving school for active life should be able to obtain in high school practical training of value to them in their field of work.

However much may be said for what should be taught, the effectiveness of instruction is determined by the quality of teaching. The most important essential for any school is that dedicated teacher who really cares and inspires in students a zeal to work, to think and learn; who encourages a respect for thrift, a love of country, a reverence for things spiritual, an appreciation of loyalty, a sense of gratitude for noble sacrifice—that teacher who sees the old church at Jamestown, the ramparts at Yorktown, the Indian raid sites in the Southwest, and the quiet at Appomattox as mute memorials of sacrificial gallantry to those who valued some things more highly than personal security. To such a teacher we can trust our destiny!

Virginia has an efficient school system. I have visited classrooms from Lee to Accomack, and sincerely believe that we have an able and dedicated body of teachers, supervisors, and school administrators. I feel, however, that what is being done can always be improved, and in seeking this improvement lies our challenge. This challenge can be met if we can muster the wisdom on each problem to recognize those things that can be changed and those that cannot.

Our great school system has been realized through the hopes, efforts, and support of the people. I have a profound faith in the representatives of the people—the Legislature and the Governor—and our State Board of Education.

In these crucial times I am deeply aware of the unusually grave responsibility involved in this position. The fact that the problems are deep

and complex is all the more reason that we should face them with intelligent study and avoid hasty decisions.

We can meet these problems if we will dispel unwarranted fears and the type of pessimism that lulls us into a do-nothing state of "what's the use?" We can meet them if we will earnestly strive for a consecrated bond of unity throughout this Commonwealth in the cause of education; if we will display the courage of dedicated conviction; and bring to bear the discipline of reason in all our deliberations.

In reflection on my experience as a farm boy in Lunenburg County, I recall my father's statement when we hitched the mules for a long day in the tobacco field: "Today, we will walk humbly and plough a straight furrow!" This, with the help of Divine Providence, I shall endeavor to do.

.....

The sections that follow in this Report indicate continuing progress made and problems faced in the improvement of Virginia's program of public education.

Division of Instruction

The program of the Division of Instruction includes those services and activities in which major emphasis is on improving learning and teaching and on the proper adjustment of the individual student. While the major concern of the Division is in the area of general education, its work is coordinated closely with that of other Divisions of the Department.

The Division of Instruction seeks to work with school divisions in the improvement of the educational program through the following types of activities:

Providing leadership to a continuing program of curriculum development.

Providing consultative services to study groups, workshops, and conferences in the planning and evaluating of programs designed to improve instruction.

Encouraging the effective use of equipment, facilities and materials of instruction.

Assisting in the effective use of accreditation and evaluation techniques as a means of stimulating improvement in schools.

Working with colleges and universities in developing and improving their teacher-education programs and in promoting the in-service education of teachers.

Encouraging and assisting in the development of programs of general adult education.

The staff of the Division strives to maintain a unity of approach to the development of general education, and to that end staff members representing the different Services of the Division meet frequently to establish common objectives and to consider ways of achieving them.

Reports on the activities of the Services of the Division for the fiscal year beginning July 1, 1957 are as follows: Elementary Education, Secondary Education, Art Education, Health and Physical Education, Music Education, Guidance, Bureau of Teaching Materials, Libraries and Textbooks, and Film Production.

ELEMENTARY EDUCATION

Purpose

The major purpose of the Elementary Education Service is to give leadership in the improvement of the total program of elementary education. This involves: (1) making continuous study of all phases of the program of elementary education in the State; (2) determining progress made in the school divisions; (3) identifying needs for further development; (4) working with local school divisions in the development of curricula; and (5) developing various types of resource materials to be used by local school personnel.

Scope

The Elementary Education staff serves directly or indirectly all school personnel who have responsibilities for elementary education throughout the

State. In 1956-57, these included 222 supervisors employed in 82 counties and 21 cities; 106 visiting teachers employed in 52 counties and 21 cities; 827 elementary school principals in schools of 5 or more teachers; and 16,705 elementary classroom teachers in 2,214 schools enrolling 556,210 children. It has, in particular, the major responsibility for improving the services and stimulating the professional growth of supervisors, visiting teachers, and elementary school principals.

Services of Elementary Education staff members are available to counties and cities upon request of superintendents, supervisors, visiting teachers, principals, and lay groups. During 1956-57, staff members made 184 visits to 57 counties and 17 cities.

Services to the field included the following: consultant services and participation in conferences and workshops in local school divisions; participation in parent study groups, faculty study groups, and division-wide study groups; serving on local school survey and evaluation committees; assisting individual supervisors and visiting teachers in planning and improving their services to the localities; giving leadership and consultative services to the elementary principals' study groups, consulting with local school personnel on plans for new elementary school buildings; assisting local school groups in the preparation of local materials; planning work conferences for supervisors, visiting teachers, and elementary school principals on a State-wide basis for the improvement of elementary education; and preparation of materials at the State level for use locally.

Accomplishments

Conferences.—During 1956-57, Elementary Education Service assumed leadership in conducting State-wide conferences for supervisors, visiting teachers, and elementary school principals as one means of promoting in-service growth. The responsibilities of the supervisor for improving instruction were emphasized at the supervisors' conferences; improving the techniques of visiting-teacher services was the theme of the visiting teachers' conferences; and the elementary principals' conferences were developed around the competencies necessary for good leadership.

One-day conferences were held throughout the State in January and February 1957 for representatives from local school divisions for the purpose of giving greater emphasis to the improvement of science instruction in grades one through nine. These conferences were held in:

Lebanon	Front Royal
Wytheville	Manassas
Radford	Danville
Lexington	Appomattox
Staunton	Farmville
Fairfax	Norfolk
Bowling Green	Petersburg
Naruna (Campbell County)	Richmond
Tappahannock	

A one-day conference was held on December 6, 1956, for representatives of private nursery schools and kindergartens together with superintendents and supervisors from those divisions having large numbers of privately operated

schools for young children. This conference was for the purpose of developing ways of achieving better understanding and greater co-ordination of the programs carried on by the two groups.

Almost all school divisions held professional meetings for teachers and administrative and supervisory personnel prior to the opening of school. These varied in length from one day to two weeks. In addition, a large number of divisions held mid-year and postschool conferences. Elementary Education staff members assisted upon request in the planning of many of these conferences and actually participated in the programs in 29 divisions.

Supervisors' reports show 98 divisions held preschool conferences, 81 divisions had mid-year conferences, and 63 had postschool conferences. There seems to be a slight trend toward replacing the preschool conference immediately prior to the opening of school with a professional conference held at the end of the first month of school. The general nature and quality of the preschool, mid-year, and postschool conferences continue to show improvement. The purpose of such meetings is more clearly defined and better planning is quite apparent.

Curriculum Development.—Consultative assistance was given in different areas of curriculum development in 31 school divisions. Curriculum improvement projects are under way in 43 school divisions as reported by supervisory personnel, with the greatest number of current curriculum development programs in science in the elementary school.

Elementary Principals' Study Program.—Elementary principals have been participating in a study of problems related to the improvement of the elementary school program. This study is being carried on through the elementary principals' district associations and through the local principals' groups in the various divisions. Twelve of the twenty-six district associations have been actively engaged in the study. The local and district groups have directed their attention to one or more aspects of the following broad topics:

1. The principal's responsibility in improving instruction
2. The principal's responsibility in improving administration
3. In-service education
4. Raising the qualifications of the elementary school principalship.

Supervisory Study Program.—The supervisory personnel, through the 13 regional groups which meet regularly throughout the school year, have engaged in studies of a good learning-teaching day for children of different maturity levels, and studies of the principles underlying various types of grouping within a school and within a particular class group.

Visiting-Teacher Services.—The visiting-teacher service continues to grow in assistance to children. An analysis of the visiting teachers' annual reports for 1956-57 reveals the scope and frequency of the major problems of children to which the visiting teachers have directed their efforts during the year. A total of 33,407, or 4.35%, of the boys and girls enrolled in grades 1-12 in 1956-57 in the public schools of Virginia were referred to the visiting teachers for assistance for some type of problem.

The table below shows the number of boys and girls referred to the visiting teachers and the major causes for referral.

REASONS FOR REFERRALS	Age Range	Boys	Girls	Totals	
School Adjustment	6-9	2,130	1,366	3,496	10,849
	10-13	2,528	1,435	3,963	
	14 and over	2,142	1,248	3,390	
Health Problems	6-9	1,245	1,018	2,263	5,771
	10-13	1,116	1,007	2,123	
	14 and over	614	771	1,385	
Attendance Problems	6-9	2,172	1,567	3,739	16,787
	10-13	3,614	2,444	6,058	
	14 and over	4,319	2,671	6,990	
Total				33,407	

Longer Employment of Supervisors, Visiting Teachers, and Nonteaching Elementary Principals.—The number of supervisors, visiting teachers, and elementary principals employed for eleven and twelve months is steadily increasing.

1. Supervisors and Visiting Teachers

	NUMBER MONTHS OF EMPLOYMENT				
	10	10½	11	11½	12
Supervisors.....	87	5	20		110
Visiting Teachers.....	78	4	10	1	12

2. Nonteaching Elementary Principals

Employment of an increasing number of nonteaching principals in the elementary schools and a longer term of employment is a significant trend in the improvement of the elementary school program. In 1956-57, there were 560 nonteaching principals, 42% of these were employed for 12 months.

The table which follows shows the relation between the size of school and the term of employment of the 560 nonteaching elementary principals.

ENROLLMENT	TERM OF EMPLOYMENT												Totals
	9 Months		9½ Months		10 Months		10½ Months		11 Months		12 Months*		
	Co.	City	Co.	City	Co.	City	Co.	City	Co.	City	Co.	City	
100-199	0	0	1	0	2	4	2	0	0	0	1	4	14
200-299	12	0	10	0	20	12	3	0	0	2	10	6	75
300-399	10	1	4	0	24	14	11	0	5	4	14	20	107
400-499	4	0	7	0	10	11	11	3	3	5	21	17	92
500-599	3	0	3	1	8	8	13	1	0	5	23	19	84
600-699	2	0	2	1	1	6	12	0	0	9	10	22	65
700-799	0	0	2	0	3	6	2	2	0	3	13	5	36
800-899	0	1	1	1	2	2	4	3	0	0	8	8	30
900-999	1	0	0	0	2	7	0	1	0	0	5	5	21
1000-1199	0	0	2	1	1	3	0	0	0	1	7	7	22
1200-1499	0	0	0	0	0	3	0	0	0	1	3	2	9
1500 and over	0	0	0	0	0	1	0	0	0	0	3	1	5
	32	2	32	4	73	77	58	10	8	30	118	116	560

*Of the 234 principals employed for 12 months, State aid was given for 115 positions, 74 of these positions were in counties and 41 in cities.

Size of Schools.—The one-teacher school continues to be eliminated in favor of larger units. The number of two- and three-teacher schools remains approximately the same; the number of four-, five-, six-, and seven-teacher schools shows some increase which is a desirable trend. The increase in schools with extremely large enrollments (those over 600) indicates a need for study.

The table below shows the size of elementary schools in terms of (1) number of classroom teachers and (2) enrollments for 1956-57 as compared with 1954-55.

CLASSROOM TEACHERS			PUPILS ENROLLED		
NUMBER TEACHERS	NUMBER SCHOOLS		NUMBER PUPILS	NUMBER SCHOOLS	
	1954-55	1956-57		1954-55	1956-57
1	494	390	Below 100	1,017	880
2	430	374	100-199	350	386
3	175	179	200-299	169	254
4	155	163	300-399	110	191
5	57	71	400-499	103	131
6	42	62	500-599	74	119
7	94	126	600-699	55	81
8	56	105	700-799	39	44
9	46	75	800-899	16	37
10	43	60	900-999	19	22
11	35	59	1000-1099	16	16
12-15	112	182	1100-1199	6	8
16-20	120	164	1200-1299	4	5
21-25	67	93	1300-1399	0	2
26-30	28	42	1400-1499	2	2
31-40	24	32	1500-1599	2	4
41-48	5	6	1600-1699	1	1

Pupil-Teacher Ratio.—The number and per cent of classrooms having enrollments over 35 pupils per teacher continue to decrease and those having 30 or fewer pupils per class show an encouraging trend as shown in the following table:

CLASSROOM ENROLLMENTS	1951-52		1955-56		1956-57	
	Number Groups	Per Cent	Number Groups	Per Cent	Number Groups	Per Cent
30 and below.....	5,042	36.5	6,558	39.7	6,952	41.2
31-35	1,187	30.3	5,616	34.0	5,958	35.3
36-40.....	2,776	20.1	2,900	17.6	2,753	16.3
41-50.....	1,536	11.1	1,282	7.8	1,107	6.5
51-60.....	225	1.6	120	.7	113	.6
Over 60.....	62	.4	32	.2	8	.04

Half-day Sessions.—A number of divisions have been able to eliminate half-day or two-shift sessions entirely and others have made great progress toward this end, but at the same time the number of children receiving only a half-day of school has increased .5% over that of 1955-56. The table which follows shows comparative figures on the number of children on half-day schedules since 1951-52.

NUMBER CHILDREN ENROLLED IN ELEMENTARY SCHOOL... (As of October 1 for each year)	1951-52			1955-56			1956-57		
	460,006			528,873			533,232		
	Co.	City	Total	Co.	City	Total	Co.	City	Total
Number Children on Half-day Sessions.....	*	*	35,674	12,702	18,190	30,892	16,178	17,650	33,828
Number Divisions Operating Half-day Sessions.....	28	16	44	23	17	40	17	18	35

*This information not available for 1951-52.

Progress of Children.—Considerable progress has been made in reducing the number of children not making normal progress through the elementary grades as revealed by the following data:

	Number Enrolled in First Grade	Number Enrolled in Seventh Grade Seven Years Later	NUMBER CHILDREN NOT MAKING NORMAL PROGRESS DURING SEVEN-YEAR PERIOD	
			Number	Per Cent
1944-45.....	84,334	50,502	33,832	40.12

Major Continuing Problems

1. Further reduction of excessive pupil-teacher ratios and half-day sessions for all children
2. Obtaining a sufficient number of adequately trained teachers for the elementary grades

3. Securing qualified personnel for elementary principalships
4. Securing adequately trained and qualified supervisory and visiting teacher personnel to meet the need in local divisions
5. Encouraging the employment of more supervisors, visiting teachers, and elementary principals for 12 months as one means of strengthening the elementary school program
6. Stimulating school improvement through more self-evaluation activities in the elementary schools
7. Developing more adequate in-service educational programs for supervisory and visiting teacher and elementary school principal personnel at the State level
8. Strengthening leadership to nursery schools, kindergartens, and elementary schools from both the local and State levels.

SECONDARY EDUCATION

Purpose

The general purpose of the Secondary Education Service of the State Department of Education is to give leadership to the development of Secondary Education in accordance with the policies of the State Board of Education.

In the discharge of the duties imposed by the functions of the Service, the staff of Secondary Education seeks to achieve certain objectives which include: (1) interpreting to school divisions policies of the State Superintendent of Public Instruction and of the State Board of Education with reference to Secondary Education; (2) providing leadership in the development of educational policies affecting Secondary Education; (3) stimulating the continuous evaluation of Secondary Education in the State at large and in local school divisions; (4) serving as a resource agency to local school divisions in connection with secondary school problems involving the organization and administration of the instructional program; (5) cooperating in providing leadership to a continuing program of curriculum development on both the State and local levels; and (6) assisting in coordinating the efforts of all professional personnel into a unified program of improving Secondary Education.

Scope

The staff of the Secondary Education Service makes available professional services to high schools in all of the counties and cities of Virginia. For the 1956-57 session 473 public high schools and 54 private high schools report work provided on the secondary level. In these schools 227,314 pupils were enrolled in public high schools, and 9,215 pupils, in private high schools.

Staff members visit schools systematically (by schedule) and by special request. The staff also works to some extent with private schools upon request.

Accomplishments

The Twelve-Year School System.—The establishment of the twelve-year school system is steadily progressing. Four hundred and sixty-six high school units in ninety-eight counties and thirty-two cities have either inaugurated or are in the process of inaugurating the twelve-year school system.

With the exception of a few schools the organizational plan for the twelve-year school system is a 7-5 arrangement; namely, seven years in the elementary school and five years in the high school.

The staff of the Secondary Education Service has encouraged the development of a twelve-year system in the State at large and has worked with those divisions that have requested help in inaugurating the program.

Employment of Supervising Principals for Twelve Months with State Aid.—An appropriation of \$300,000 was made available for the first year of the biennium to aid school divisions in the employment of supervising principals for twelve months. During the summer of 1956, 450 principals were employed on a twelve-months basis with State aid by 94 counties and 28 cities.

The purpose of this program is to assist school divisions in raising the administration, operation, and supervision of the schools to a higher level of efficiency. Improved organization and the promptness with which the work of the regular session is begun, better planning of the entire program, supervision of school activities carried on during the summer months, enriched school-community relationships, and increased services of the schools to the pupils and communities, are among the accomplishments reported by division superintendents.

Accreditation of High Schools.—The accreditation of high schools in Virginia, while regulatory in function, has as its chief value the stimulation of growth and improvement in schools. The standards for accrediting secondary schools were developed cooperatively with representatives of the teaching profession and representatives of the public at large. These standards are designed to provide general guidance and direction for the high schools of the State in the promotion of better education for Virginia's youth.

For the 1956-57 session there were 417 accredited public high schools, 30 accredited public junior high schools, and 51 accredited private secondary schools. During the year, the Preliminary Annual High School Report of each public and private high school was reviewed and analyzed in terms of the accrediting standards. Schools were advised of existing deficiencies. Some schools were able to make corrections during the year. A number of schools were visited for the purpose of reviewing with them their Preliminary Annual Reports and accrediting standards not being met, and to consider ways of meeting fully all standards.

Evaluation of High Schools.—During the 1956-57 session, the Secondary Education Service assisted nine schools in their evaluation programs through the use of "The Evaluative Criteria". One hundred and five persons, including superintendents, principals, classroom teachers, State Department personnel, and college faculty members, served as members of visiting committees. "The Evaluative Criteria" is regarded by many educators as an effective guide for staff members in their efforts to improve the program of the school.

Program of Southern Association of Colleges and Secondary Schools.—By virtue of his position, the State Supervisor of Secondary Education is a member, ex-officio, of the Southern Association's Commission on Secondary Schools which is composed of seven or more educators from each of the states in the Southern region. There are eight persons from Virginia on the Secondary Commission. These persons constitute the Virginia Committee which is responsible for giving leadership in the State to the Southern Association's policies and standards of accreditation for secondary school improvement. The State Supervisor of Secondary Education serves as Executive Secretary of the Committee and provides general supervision and coordination of its work.

During the past year, 117 schools were members of and 28 schools were approved by the Southern Association.

Tests of General Educational Development for Civilian Adults and Military Personnel.—The Tests of General Educational Development for civilian adults were administered upon request of division superintendents to 941 persons. Four hundred and four certificates were issued for successful performance on these tests.

The Secondary Education Service in line with the policy of the State Board of Education of recognizing the high school level Tests of General Educational Development of USAFI, issued during the year certificates to 612 former Virginia pupils who are now serving in the Armed Forces.

A General Educational Development Study Committee held two meetings during the year for the purpose of reviewing the general educational development program.

The Study of the Leadership Role of the Principal in the Improvement of Secondary Education in Virginia.—Throughout the year secondary school principals have been participating in a study of the leadership role of the principal in the improvement of Secondary Education. This study is being carried on through the various district associations. Each district group has been meeting regularly and has been analyzing one or more of the challenges outlined in "Guidelines for the Study of the Leadership of the Principal in the Improvement of Secondary Education in Virginia." These guidelines were produced by a representative group of principals during the summer of 1955.

The challenges which have been selected for study are:

"How Can We Measure Desirable Pupil Growth and Interpret This Growth to Those Concerned?"

"What Is the Place of Pupil Activities in the School Program?"

"The Principal's Role in Creating and Maintaining a Desirable Atmosphere and Morale Within the School."

"How Can the Eighth Grade Be Made More Effectively an Integral Part of the Twelve-Year Program?"

"Clarifying the Statement: The Principal Is the Responsible Head of His School."

"What Should Be the Requirements for Graduation and How Should They Be Measured?"

"What Should Be the Policy, Procedures, and Standards Governing Accrediting of Public Schools in Virginia?"

"How Can the Principal Fulfill His Responsibilities for Involving the Entire Staff in the Effective Operation of the Total School Program?"

"How Can the Principal Organize and Administer an Effective Guidance Program for Boys and Girls of the School?"

"What Is the Role of the Principal in School-Community Relations?"

"To What Extent Is the Principal Responsible for Organizing and Administering a Program of In-Service Education?"

Conferences.—The Staff of the Secondary Education Service participated in many county and city meetings, pre-school conferences, meetings of district associations of high school principals, regional groups of supervisory personnel, and State-wide conferences.

Two State-wide conferences of high school principals were held during the year, one at Madison College, Harrisonburg, Virginia, June 18-20, and one at Hampton Institute, June 19-21. The primary purpose of the State-wide Con-

ferences was to provide opportunities for the cooperative evaluation of the long-range study program which is now in progress.

Education for Indians on Virginia Reservations.—The Secondary Education Service has the major responsibility for the administration and supervision of the school for Indian children operated by the State Board of Education. This school is located on the Mattaponi Reservation and serves jointly the children from both the Mattaponi and Pamunkey Reservations, the two recognized Indian Reservations in the State.

In 1956 the parents of the children living on these two Indian reservations requested that high school work beyond the eighth grade be offered in the Indian reservations school in lieu of sending the children elsewhere to complete their high school education as had been the practice in the past.

Beginning with the 1956-57 session, the high school program for the ninth and tenth grades was offered, and the eleventh grade program will be offered during the 1957-58 session.

The 1956-57 total enrollment of the Indian reservations school was 27 pupils of which 14 pupils were enrolled in grades eight through ten.

Education of Adults and Aliens.—During the year 1956-57 approximately 10,468 adults were enrolled in the general adult education classes for which the State Department of Education provided 34 per cent of the cost of the instructors' salaries. These persons were enrolled in courses in the following broad areas: high school subjects, elementary school subjects, parent education, safety education, music, business education, public speaking, home arts, fine arts, community problems, and Americanization.

The Bureau of Immigration and Naturalization of the U. S. Department of Justice sends to the State Department of Education the names of aliens as they arrive in Virginia. The Bureau also provides home study materials which aliens may use to prepare themselves for citizenship. The Service continues to distribute these materials through the division superintendent's office to all aliens who request them. During the year, 189 aliens used these home study materials.

Preparation of Science List and Material.—A small science curriculum study committee held three meetings during the year for the purpose of extending and refining the general science materials for grades 8 and 9 which were produced in the summer of 1955 and to prepare a list of laboratory supplies needed for the general science course. The work copy of the list of laboratory supplies for general science instruction prepared by the committee was sent to the division superintendents for the purpose of encouraging general science teachers and others to study their general science supplies in relation to the use being made of them and to secure the reaction of the science teachers to the items contained in the list.

Major Continuing Problems

1. How may we assist school divisions in developing a program of education with sufficient breadth and depth to meet the educational needs of boys and girls of high school age?
2. How may we work with teacher training institutions and local school officials through pre-service and in-service training programs in securing a sufficient number of adequately trained teachers?
3. What curriculum materials should be prepared for use in the secondary

schools and how may we assist school divisions in developing curriculum materials on the local level?

4. How may accreditation and evaluation be used to stimulate maximum school improvement?
5. What services can we render throughout the year and particularly during the summer months to increase the effectiveness of services rendered by supervising principals employed for twelve months with State Aid?
6. How can we best assist local school divisions in developing a program of general adult education as an integral part of the comprehensive school system?
7. How can we utilize more fully the resources of agencies and groups in the State for improving secondary education?

ART EDUCATION

Purpose

The purpose of the Art Education Service is to provide that quality of leadership which will contribute to the growth of Art Education throughout the Commonwealth. A major purpose is to help school administrators and teachers gain an understanding and provide a leadership that will afford all children and youth varied opportunities in art. Another important objective is to stimulate and assist with community efforts which work toward an enriched aesthetic life for all the people—children and adults. In the promotion of this approach to the cultural development of our people, our work includes the following:

1. Interpretation of Art Education to school, parent and lay groups.
2. Stimulation of the continuous improvement of pre-service and in-service art training of all teachers.
3. Assistance with the organization of art offerings in schools and colleges, and encouragement of provision for adequate facilities, equipment and personnel.
4. Preparation and distribution of written and visual instructional materials.
5. Dissemination of current art information of interest to school and community.
6. Coordination of art efforts of many education, museum and civic groups.
7. Maintenance of a continuous evaluation of the quality and direction of the State-wide work in Art Education.

Scope

The Art Education Service staff guides both educators and laymen in an effort to stimulate better thinking, learning and living through growth of art in schools and communities. In accordance with the major purpose, however, the largest portion of time is spent in giving consultative and evaluative assistance, on a request basis, to personnel in the public schools and State-supported colleges. This is accomplished through demonstrations and art workshops, visits to classrooms and art exhibitions, individual and group conferences, participation in group meetings of school personnel, and school-community meetings. The scope of work extends into community life through the co-sponsorship of art festivals and cooperation with museums, PTA, and various other local and State groups. There is a further extension of scope through association with regional and national art groups; also through national and international use of Virginia's State art bulletins.

"Art and the Child," published in 1948, clarifies objectives and suggests procedures and practices for the elementary schools. It is available to all elementary teachers. Recently, there has been much development in Art Education on the high school level, with the opening of numerous new art departments, and added impetus and interpretation being given to such development through the most recent State art publication, "Art and Youth." Another healthful trend is indicated by the cooperative planning being used by some school divisions when establishing art offerings in their schools. Work of the present State Certification

Committee will also undoubtedly upgrade standards in Art Education and influence teacher education curricula in this field.

Statistics on visitations for the fiscal year 1956-57 are as follows: School divisions, 98; classrooms, 455; colleges, 33; museums, 61; pre-school conferences, 5; workshops, 14; art festivals, 7; art exhibits, 28; midyear and other conferences, 18; State conferences, 14.

Accomplishments

1. A State Conference of Supervisors of Art was held in conjunction with the State Conference of general supervisors.
2. Co-sponsorship of the Virginia Highlands Festival of the Arts held annually from August 1-15 in Abingdon, was continued.
3. Co-sponsored a fourth State Art Conference in cooperation with Hampton Institute.
4. Produced a periodic newsletter for art educators and school superintendents.
5. Designed layout and illustrations for the Visiting Teachers Guide; also covers for other bulletins.
6. Assisted in designing a State Fair exhibit in cooperation with other services of the State Department of Education.
7. Assisted in establishing art offerings in several new high school art departments; also gave assistance with art room planning and evaluation of high school art programs.
8. Continued the distribution of materials, such as: slides, prints, textiles, sculpture, books and mimeographed materials which are available to art personnel in public schools and State-supported colleges.
9. Assisted the Junior Red Cross with selection of work from several school divisions to be used for the International Art Exchange.
10. Discussed the new State art bulletin "Art and Youth" with various groups in the State.
11. Advised division superintendents in regard to the procurement of new art personnel.
12. Prepared and presented reports on certification standards in Art Education to the State Certification Committee.
13. Members of the State art staff served on several national committees on Art Education.
14. Excerpts from the State art publication "Art and Youth" were published in the 1957 Yearbook of the National Art Education Association.

Major Continuing Problems

1. A more general understanding of the creative experience by all teachers; also its application to child growth and the school program as a whole.
2. There is a great need for art workshops for general supervisors, developed perhaps, on a voluntary basis.
3. Greater awareness by all school personnel of the effect of a visually attractive school environment on living and learning.

4. More effective means are needed for helping administrative and supervisory personnel develop leadership ability in furthering Art Education.
5. Need for continued emphasis upon the acquisition of adequate equipment, facilities and teaching materials in Art Education. Without these, no effective work is possible.
6. More adequate means for interpreting our written instructional materials. With the new high school art guide "Art and Youth" recently off the press, this problem is an immediate one.
7. The need for continued evaluation on all levels of growth, of school practices in Art Education.
8. The yearly turnover of art personnel and the insufficiency of art teachers to fill available positions.
9. A more unified means for orienting new art personnel to their work.
10. Better ways to interpret to parents and the lay public the purposes of Art Education on all levels of growth.
11. More visual aids in art to supplement our written instructional materials for the secondary schools.

BUREAU OF TEACHING MATERIALS

Purpose

It is the purpose and function of the State Bureau of Teaching Materials and the four Regional Bureaus of Teaching Materials, located at Longwood, Madison and Radford Colleges, and the University of Virginia, to provide certain materials of instruction and to promote the effective use of these and other materials in the classrooms of the public schools and State institutions of higher education.

In fulfillment of these purposes, the Bureaus direct their efforts toward the following:

1. Providing upon request from schools certain audio-visual materials, namely educational motion pictures and tape recordings for regular classroom instruction.

2. Encouraging and assisting school divisions and individual schools in:
 - a. Selecting, acquiring, distributing, and using various kinds of teaching materials and equipment.
 - b. In establishing and improving facilities which will permit better and more extensive use of teaching materials.
3. Helping teachers, both in in-service and pre-service status, to become increasingly aware of the values of various instructional materials to pupil learning and to acquire skill and competency in the use of such materials.

Scope

Table 6—DISTRIBUTION AND USE OF MOTION PICTURES 1956-57, includes a statistical report on the distribution of educational motion pictures by the State and Regional Bureaus of Teaching Materials. It also reports on the distribution of films owned by certain school divisions.

The State and Regional Bureaus of Teaching Materials provide the following services:

1. Educational motion pictures for use in the classrooms of public schools and State-supported colleges.
2. Educational motion pictures by special arrangement to private colleges that offer degrees in education.
3. Educational motion pictures to county and city health officials for use in their educational programs. This service is provided through special agreement with the State Health Department.
4. Educational motion pictures to county agricultural and home demonstration agents for use in their educational programs.
5. Motion pictures and recordings for use in pre-service and in-service training of teachers and for use in interpreting to the public the educational program of the schools.
6. Motion pictures and recordings for use by PTA's in their educational programs.
7. Listings of filmstrips approved for purchase with State matching funds through the Textbook and Library Service.
8. Certain audio-visual equipment to all Services of the State Department of Education.
9. Motion pictures and certain audio-visual equipment to other State agencies for use in their educational program.
10. Supervisory assistance to division superintendents, supervisors, and individual teachers in the acquisition, organization, care and utilization of all types of teaching materials.

Accomplishments

The following are some evidences of progress in the over-all growth of the Teaching Materials program during 1956-57.

1. A total of 196,718 educational motion pictures were booked from the State, Regional, and Division Teaching Materials Centers by public

schools for use in their classrooms. During the 1956-57 school year it is estimated that there were approximately 20,000,000 pupil viewings of these films. In other words, pupils in Virginia public schools viewed an average of 35 films in the course of their regular studies during the past year.

2. Approximately 75,200 bookings of films were made from the State and Regional Bureaus of Teaching Materials. On the basis of normal film rentals charged by university film libraries throughout the country, the value of these bookings to schools could be said to exceed \$260,000.00.
3. The revised, 1956, "Educational Motion Pictures for Virginia Public Schools" was distributed early during the fall term. This bulletin lists more than 2,000 separate film subjects, applicable to all subject areas and for all educational levels, from primary grades to adult education.
4. A careful analysis was made of the use of films in all divisions to determine the comparative average use by teachers and the utilization of locally owned films in those divisions having their own teaching materials centers. Reports of these analyses were sent to the division superintendents and in a number of instances were followed by visitation of the supervisory personnel of the Bureau of Teaching Materials. As a result of these analyses, a number of divisions have improved their programs as is indicated in item 5 below.
5. While improvements in both offerings and use of teaching materials varies considerably within the various school divisions, a number of school divisions made notable improvements in such areas as:
 - a. Providing for more effective administration and supervision of their programs.
 - b. Providing a wider and better balanced offering of materials.
 - c. Providing improvements in methods of distribution of materials.
 - d. Providing improved facilities for use of materials (equipment, room darkening, etc.).
 - e. Providing in-service training to teachers in more effective use of materials.
6. With the increasing emphasis on science instruction, both at the elementary and secondary level, the demand for films and related instructional materials for this year has been accelerated. More than 30 per cent of the total number of films booked related to some area of science instruction.
7. An effort has been made to obtain more specific and valid information in regard to the following:
 - a. The values of various kinds of teaching materials to the instructional program.
 - b. Conditions and situations under which they are used.
 - c. Factors affecting or limiting their use.

The Bureau of Teaching Materials undertook a detailed study of the programs in a selected number of schools. These included Elementary and Secondary schools in both urban and rural commu-

nities. The study involved obtaining both statistical information and opinions of teaching materials representatives and teachers in the schools involved. Over 95 per cent of the schools included in the study provided statistically reliable information in regard to their progress. The data derived from this study has been compiled and analyzed, and summaries have been made available to division directors of teaching materials. The Bureau further expects to make reports of the study available to division superintendents. It is expected that the results will be most helpful in determining needed future action in reference to teaching materials at the State, Regional, Division, and individual school levels.

8. A workshop dealing with GOALS FOR THE TEACHING MATERIALS PROGRAM was held the last week in June at the University of Virginia. It was sponsored by the State Bureau of Teaching Materials for the Association of Division Directors of Teaching Materials. During the workshop, first steps were taken in a project which is aimed at eventually developing standards for the administration and supervision of the Teaching Materials Program within the school divisions.

Continuing Problems

1. The need for additional materials at the State, Regional, and Division level. This particular need was listed as the number one problem by more than 500 individuals who responded in the study described in item 7 above. It was also borne out by the fact that we were able to fill less than 50 per cent of the requests received at the State Bureau of Teaching Materials.
2. While our records show that the use of various types of Teaching Materials (particularly educational motion pictures) has increased each year since the beginning of the State Program in 1940, the booking records along with the study referred to in item 7 above, indicate that there are wide variations in the use of materials, not only between divisions and schools within the division, but between teachers within the individual schools. This indicates the need in many divisions for developing an increasing awareness on the part of teachers of the value of educational motion pictures in their instructional program. It also indicates the need for providing facilities which will permit and stimulate the effective use of such materials.
3. The growing awareness of the vital necessity of providing science instruction to all pupils in the elementary school and further to provide opportunities for good science instruction to all qualified and interested pupils at the secondary level, points up the vital need for materials and equipment in this area of instruction.
4. The need for better administration and supervision of the use of Teaching Materials in many school divisions.
5. The need for providing instruction in the value and use of materials to teachers at both the pre-service and in-service level.

FILM PRODUCTION SERVICE**Purpose**

The Film Production Service was established in 1946 by an act of the General Assembly to produce educational motion pictures and filmstrips on history and natural resources in Virginia. This service has now been extended to cover films in other areas of public education as well as for other Virginia State agencies.

Scope of Work

This Service has the technical staff to produce 16 mm motion pictures in sound and color as well as filmstrips, slides and other audio-visual aids of professional quality. Production usually follows the order indicated below:

1. Research and Writing.—Background research and preparation of the script is done in cooperation with technical advisors in the field being filmed.
2. Photography.—A photographic crew is sent on location to appropriate places in the State to photograph scenes for the picture. Special lighting equipment is used on inside scenes. Sound recording is usually done in our sound recording studio; however, there are occasions when sound recording on location is done.
3. Editing.—The film is edited and prepared for recording, with narration written and rechecked with the technical advisors.

4. Recording.—The music, narration and sound effects are recorded and mixed to make the final sound track for the film. Picture and sound are synchronized.
5. Laboratory.—All laboratory work for the development of the film and making of prints is done by commercial laboratories; the Film Production Service supervising and approving the work.
6. Distribution.—Copies of the completed film are placed in the State and Regional Bureaus of Teaching Materials for State distribution. Copies are sold at cost to Virginia public schools and to the local school divisions. A catalog is published for out-of-state use and films are rented and sold, primarily to schools and colleges, in other states.

By much the same process as above, color filmstrips are produced and distributed. In addition, slides, still pictures, disc and magnetic tape recordings are made for various services of the Department of Education and local school divisions, as well as for other State agencies.

Upon request the Film Production Service advises and assists local school divisions in preparing their own audio-visual aids.

Accomplishments

Motion Pictures Completed:

GEORGE MASON OF GUNSTON HALL.—1 reel. To show George Mason's major historical contributions and the surroundings in which he lived.

WILSON'S BIRTHPLACE.— $\frac{1}{2}$ reel. A preface to the film, *SPOKESMAN FOR TOMORROW*, stressing Woodrow Wilson's heritage and the environment that he knew as a child in Staunton, Virginia.

Motion Pictures Nearing Completion:

ONE SECOND TO SAFETY.—2 reels. To improve the attitude of the individual driver by showing him what the State is doing for him in the field of safety.

VIRGINIA'S CAPITOL.—1 reel. (Revised.) A tour through Richmond's Capitol Square, with its impressive Capitol and the adjacent buildings and statues that reflect Virginia's history.

Motion Pictures in Production:

JAMESTOWN, A PLACE OF BEGINNINGS.—Showing the settlement of Virginia through the first 90 years with emphasis on Jamestown as the beginning of our American way of life.

RETARDED CHILDREN.—For the in-service training of teachers of mentally retarded children: to show good procedures to use in working with the severely retarded.

AGRICULTURE.—3 reels. To show the services and facilities of the State of Virginia in the field of Agriculture.

Filmstrips Completed:

PUBLIC EDUCATION, VIRGINIA'S INVESTMENT IN THE FUTURE.—A filmstrip on public education's purpose, program, and needs.

Other Accomplishments:

Magnetic tape recordings were made at a number of State-wide conferences including the Elementary Principals, the Rehabilitation Service, and the Virginia Education Association. Many of our tapes are turned over to the Bureau of Teaching Materials for distribution.

Black and white still pictures to be used in various publications were made for several departments, including a series for Trade and Industrial Education.

A series of color 2 x 2 slides were made for the Special Education Service to be used in training teachers. Help was also given Arlington County in shooting a number of color slides on a local history project.

Distribution:

There were 95 prints placed in the five State Film Libraries and 62 prints bought by local divisions during the year. This brings to over 1,000 the number of prints now in use in Virginia.

The motion pictures produced by the Film Production Service are being rented in every state and have been purchased in most states; also in Hawaii, Canada, Egypt, and Puerto Rico. The U. S. State Department purchases them for distribution overseas.

During the year 90 copies were sold outside of Virginia and 201 rented.

Many of these films have been shown throughout the United States on television.

GUIDANCE**Purpose**

The Guidance Service gives leadership to the development of improved guidance programs throughout Virginia's public schools. Assistance is given to local school divisions in their efforts (1) to organize and improve guidance services in the local school divisions (2) to secure qualified guidance personnel and (3) to provide effective inservice training for all school personnel to the end (a) that each pupil will better understand himself—his strengths, weaknesses, interests, needs, etc. (b) that each pupil will better understand the complex world about him—its increasing opportunities, obligations, etc. (c) that each pupil may become progressively more capable in solving his problems, providing for his needs, developing his potentialities and achieving worthwhile aspirations.

Scope

The Guidance Service offers assistance to all who are concerned with the improvement of guidance in Virginia. This includes all public elementary and secondary schools; teacher training institutions; State and local agencies; civic organizations; and others.

All teachers in grades one through twelve have opportunities and responsibilities for providing guidance. Guidance coordinators and teacher-counselors have specific responsibilities for extending and improving the guidance in a particular school. The Guidance Service is interested in the improvement of the competencies of all teachers to provide better guidance as well as the competencies of those who have specific responsibilities.

The Guidance Service is a clearing house for developments in guidance on the State and national levels. Practices which have proved beneficial and current literature which deals with specific areas are reported to the local school divisions through the newsletter "Guidance News and Views" and through visiting and conferring with personnel in the local divisions.

The activities engaged in during 1956-57 by the Guidance staff members include the following:

1. Assisting local school divisions in:
 - (a) Recognizing need for and importance of coordinated guidance services.
 - (b) Developing and using curriculum materials.
 - (c) Securing guidance information through newsletter, memoranda, bulletins and visits.
 - (d) Evaluating secondary school programs by means of "Evaluative Criteria."
 - (e) Planning and developing conferences and workshops.
2. Assisting local school administrator in:
 - (a) Recognizing the importance of his role as head of the guidance program.
 - (b) Providing adequate facilities, time and personnel to meet their guidance needs.
 - (c) Organizing and extending an effective program of guidance service.
 - (d) Discussing the role of guidance in the total school program.
 - (e) Working with classroom teachers on the improvement of instruction through better guidance.
3. Assisting local guidance personnel in:
 - (a) Recognizing their responsibilities to administrator, faculty, students, parents and community.
 - (b) Developing files of educational and vocational information.
 - (c) Developing adequate forms and methods for collecting and recording useful information on each pupil.
 - (d) Selecting, administering, interpreting and using standardized tests to improve individual and group instruction.
 - (e) Advising on methods of educational and vocational placement.
 - (f) Suggesting ways of conducting follow-up studies.
 - (g) Planning and carrying through studies in certain areas of guidance.
 - (h) Organizing and strengthening district organizations.
4. Working with other services in the State Department of Education in:
 - (a) Developing curriculum materials.
 - (b) Participating in conferences and workshops.

5. Working with committees on certification of guidance personnel.
 - (a) Meeting twice with college representatives concerning counselor certification and the improvement of counselor training programs.
 - (b) Cooperating with committee of counselors appointed by VEA Guidance Section to study counselor certification.
 - (c) Working with district guidance groups studying counselor certification.
 - (d) Discussing counselor certification with a committee composed of superintendents, principals, directors of instruction, counselors and college personnel.
6. Assisting local and State associations in:
 - (a) Planning programs dealing with guidance and guidance services.
 - (b) Participating on programs giving information about guidance.
7. Cooperating with State colleges in providing work conferences for counselors.

Accomplishments

Some evidences of progress in improving the guidance available to boys and girls in Virginia's public schools are as follows:

1. There is an increasing interest on the part of parents, businessmen, teachers and administrators in providing better guidance to pupils.
2. More schools are providing the necessary personnel, facilities and time for individual counseling and related guidance activities.
3. A larger number of secondary schools are meeting the accrediting requirements which pertain to guidance.
4. Visits were made, on invitation, to 32 counties and 11 cities to advise on ways of improving guidance.
5. Conferences—Staff members of the Guidance Service participated in conferences of the Virginia Education Association, Virginia Personnel and Guidance Association, Southern Regional Conference of State Supervisors, Regional Womanpower Conference, Virginia Parents and Teachers Association, Guidance Workshop at the College of William and Mary, and the American Personnel and Guidance Association. Staff members also participated in many other conferences sponsored by the State Department of Education and local school divisions.
6. Requests continue to be filled for the following publications of the Guidance Service:

"Guidance in Virginia's Public Schools"

"Guidance in the Elementary School"

"Guidance Handbook for Secondary Schools"

"Virginia Plan of Filing"

"Financial Assistance to Attend Four-Year Colleges and Universities in Virginia"

7. Materials—Four issues of "Guidance News and Views" were prepared and sent to all school divisions during the school year.

Major Continuing Problems

1. Establishing standards for the certification of guidance coordinators and teacher-counselors.
2. Revision of guidance bulletins.
3. Better continuity of guidance between the levels of elementary, secondary and higher education.
4. Further improvement in identifying and motivating talented youngsters so that a larger percentage will continue on with college training.
5. Continued cooperation with teacher training institutions in the pre-service and in-service training of guidance coordinators and teacher-counselors.

HEALTH AND PHYSICAL EDUCATION, SAFETY AND RECREATION

Purpose

The Health, Physical Education, Recreation and Safety Service offers leadership to the public schools of Virginia in the improvement of programs of health education, physical education, and safety education including driver education. In addition, the Service promotes school-community recreation and serves as a coordinating service for school Civil Defense. The Service is also responsible for preparing teaching aids which can be used by local school authorities in the development of these programs.

Specific kinds of services provided local school divisions are: in-service teacher training, consultation, preparation and interpretation of materials, and practical demonstrations of program organization, planning and teaching techniques.

Scope

Each elementary teacher in the public schools of Virginia teaches Health and Physical Education and a high percentage of high school teachers also carry responsibility in health and physical education or driver education or both. In addition, the eighteen colleges which conduct teacher training in this field look to the Service for assistance and guidance in the development of teacher training programs for the classroom teacher as well as the specialized health and physical education teacher and the teachers of driver education.

Every public school—both elementary and secondary—has a program of health education, physical education, and safety education. In addition, some schools conduct community recreation programs, and others participate in school-community recreation projects.

The staff of the Service works with all official State agencies and a number of non-official groups which have a responsibility or an interest in some phase of Health, Safety or Recreation. More effective coordination between all interested groups has resulted.

During the year the staff of the Health and Physical Education Service rendered the following services:

Number of school divisions visited.....	86
Number of extra visits to school divisions.....	41
Number of different schools visited.....	367
Number of teachers contacted.....	1,481
Number of conferences with principals.....	362
Number of conferences with supervisors and division administrators.....	183
Number of preschool and special workshops.....	22
Special services to school divisions.....	19
Miscellaneous services rendered by staff such as speeches and consultant service.....	86

Accomplishments

General—During the year, the staff of the Service assisted most of the school divisions in the development of improved programs of instruction. Emphasis was also placed upon the initiation of the Evaluation Project. The Evaluation Project is intended to be both a study project for improving instruction in health and physical education and the source of suitable materials for a plan of evaluation for the future. The Project is designed to include all health and physical education teachers and other school personnel who care to participate. The response by both teachers and schools has been most gratifying.

Health Education.—Although there is need for further improvement, teachers throughout the State are exhibiting improved skill and interest in the teaching of health. The Evaluation Project contributed much toward this improvement. Through this project a number of school divisions devoted much time and study to ways and means of determining pupil growth, achievement, and understanding in the various aspects of health. Emphasis was also directed during the year toward more functional use of materials in health education, including those issued by the State Department of Education.

Physical Education.—More schools are scheduling classes in physical education in the high schools according to grade and age of pupils, thus making possible a more careful planning and coordination of the program to meet pupil needs. Practically all high schools are assigning specific teachers for instruction in health and physical education rather than considering instruction in this area as an extra responsibility for other teachers in the school. The evaluation project has had the same effect upon the improvement of the local physical education programs as indicated in the previous paragraph for health education.

An increasing number of high schools in the State have taken advantage of the opportunity to offer health and physical education for credit with the result that the programs in those schools have shown marked improvement.

Safety Education.—There appeared to be a substantial improvement in the quality of driver education instruction during the past year. The increased time assignment to driver education in most schools was most significant. More schools provided practice driving instruction and thus the number of complete programs increased. Seventy-eight (78) per cent of the high schools now offer driver education instruction and these schools in turn enrolled 41,293 pupils in some type of a course during the past year. One hundred and eighty-seven (187) schools offered the complete course in driver education (classroom plus practice

driving) and one hundred and twenty-three (123) schools offered only classroom instruction. An increased number of schools qualified for issuance of insurance discount certificates to pupils who completed either the classroom or complete course in driver education. The Department of Education has continued to cooperate with the Department of State Police, The Governor's Highway Safety Committee, and the Division of Motor Vehicles in the promotion of the driver education program.

The Department was granted the Outstanding Achievement Award for the seventh consecutive year in the National School Traffic Safety Inventory conducted by the National Safety Council.

The curriculum in safety education includes not only driver education but also civil defense instruction and other areas such as home, school, community, and recreation safety.

Recreation.—Localities have continued to request assistance in developing local recreation programs. To this end they have received staff assistance.

Outstanding in the year's work in recreation was the annual Recreation Institute held at Natural Bridge. The Service cooperated with the Inter-Agency Committee on Recreation on this and other projects.

In addition to the above efforts in recreation, a short course in recreation leadership was conducted at the annual music camp. Also, the supervisor of the Service who serves as the departmental representative on the Inter-Agency Committee on Recreation of the State government served as chairman of that group during the past year. More effective coordination of recreation services by State agencies is evident as a result of the work of the Inter-Agency Committee.

Major Continuing Problems

1. Development of local curricular materials for health, physical education, and safety plus more adequate local planning for complete offerings in health and physical education.
2. Continued opportunities for workshops or in-service training in health and physical education for elementary teachers.
3. Continued emphasis upon the proper use of State guides by field personnel.
4. Development of school recreation programs, school camping and outdoor education programs.
5. Continued emphasis upon acquisition of adequate equipment, facilities, and teaching materials in health, safety and physical education is indicated as a need for the improvement of instruction.
6. Improved health instruction programs for grades 1-12 plus improved teacher preparation for health needs the constant attention of the staff.
7. Continued shortage of trained health and physical education instructors as well as teachers of driver education has been one reason for the slow development of complete programs at the local level.
8. Expanded offerings in health and physical education (grades 1-12) and driver education for all pupils needs to be continually emphasized in order to adequately prepare pupils for life.

9. Development of more positive and practical procedures for evaluation of results achieved in programs of Health and Physical Education.
10. Increased emphasis on all phases of the driver education and safety program.

LIBRARIES AND TEXTBOOKS

Purpose

The School Libraries and Textbooks Service has as its purpose the (a) direction and supervision of public school libraries in Virginia (b) preparation and distribution of lists of approved teaching materials (c) maintenance of a professional library to serve educational personnel (d) processing of State-aid library orders for the schools (e) administration of the textbook program.

Scope

The Service offers supervisory assistance to all local school divisions by personal visits, correspondence, workshop and conference participation, and by preparation of bulletins and memoranda. The services given include (1) assistance in the purchase, organization and use of instructional materials (2) assistance in developing and maintaining effective library programs and (3) assistance in establishing free textbook programs.

Accomplishments

Visits to Local Divisions.—During 1956-57 school year, members of the staff of the School Libraries and Textbooks Service visited thirty-five school divisions, three State colleges, and participated as resource person in seven workshops or conferences held in local divisions.

Increase in Number of Librarians.—Although the shortage of qualified librarians continues, according to data supplied by division superintendents, Virginia employed 545 certified librarians in the public schools for 1956-57. Of this number, 352 received training at 8 Virginia institutions and 193 attended 38 out-of-state institutions. One hundred and sixty-four of these librarians were employed in the elementary schools and 381 were employed in combined or high schools.

Book Deposit Centers Increase Service.—Collections of sample library books are maintained at fourteen locations in Virginia for the purpose of offering school personnel an opportunity to examine new materials. During 1956-57, the persons who direct these centers have developed schedules that provide for local groups to visit the centers as well as for parts of the collection to be sent to local school divisions on a loan basis.

C. W. Dickinson, Jr., Scholarship Award.—Two scholarships of \$50.00 each were given in the name of C. W. Dickinson, Jr., during 1956-57, to outstanding high school seniors who plan to enter the field of library work. The recipients this year are Nancy Kay Clements of Southampton County High School and Sandra Virginia Smith of Halifax High School.

Professional Library Collection Available to Teachers.—The Library of the State Department of Education continued to lend materials in the field of education to a large number of borrowers throughout the State. This material consists of books, magazines, pamphlets, and government documents which were used by individuals and groups of persons in workshops.

Librarians Participate in State Evaluation Program.—In cooperation with the Secondary Education Service, seven public school libraries in Virginia served on committees to evaluate public high schools in the State.

Evaluation Committees Review Books for State Lists.—The Elementary Materials Committee and the High School Materials Committee reviewed approximately 2,000 books for the current State lists, and approved 1,422 new titles for additions to the 1957-58 State-aid library lists.

Adopted Textbooks on Consignments to School Board.—There is maintained an active record of adopted textbooks in use in the several school divisions, purchases and sale of adopted textbooks by local school boards, certification of inventory count of textbooks on hand, and fire insurance coverage on textbooks.

Free Textbook Program for Elementary Public Schools.—During the school year 1956-57, the State allotted to local divisions for the operation of the free textbook program \$203,000.00. The State Free Textbook appropriation of one dollar per pupil was allotted to 203,000 pupils enrolled in the following counties and cities: Arlington, Chesterfield, Fairfax, Henrico, James City-Williamsburg, Nelson, Norfolk County, Shenandoah, and Wythe; Colonial Heights, Hampton, Hopewell, Newport News, Norfolk City, Norton, Portsmouth, Richmond City, Roanoke City, South Norfolk, Suffolk, Williamsburg-James City, and Winchester.

Savings in State-aid Library Funds Through Central Purchasing Systems.—Discounts of more than \$158,000.00 were realized through the wholesale purchase of materials in the total amount of \$578,678.75. State-aid Library orders totaling this amount were processed, and sent to publishers with shipping instructions for direct delivery to Virginia public schools. It is encouraging to note the splendid

cooperation received from local school authorities who have prepared and sent in their orders with checks attached before the close of schools in June. Buying library books in the summer makes it possible for the new books to be ready for circulation when schools open in September.

Continuing Problems

1. A need to provide magazines to the schools through the State-aid matching funds, for the purpose of developing greater appreciation on the part of the pupils for better periodicals.
2. A need for an increased number of qualified librarians, especially in the elementary schools.
3. A need for the employment of library supervisors in the local school divisions.
4. A need to provide more books for the schools, especially schools which have been built in recent years and are striving to meet State standards of five books per pupil.
5. A need for extended opportunity for the training of school librarians in Virginia, both on the undergraduate and graduate level.

MUSIC EDUCATION

Purpose

The purpose of the Music Education Service is to offer leadership which will not only maintain but also improve the quality of instruction in music in the public schools of Virginia. Music is viewed as an essential subject area in the curriculum through which each child can discover his own individual musical interests and begin to develop his own unique musical potentialities. In order to provide such opportunities for musical development a program of varied musical activities is recommended for Virginia schools. This program is based on the premise that every child born without some physical impairment such as deafness can develop a response to music which is satisfying to him personally.

It is recognized that there will always be individual differences in the way children respond to music and in the way they develop musically. Just as all children do not write, read, spell or draw equally well, they will not all sing, play instruments or otherwise participate in musical activities equally well. This suggests, then, that the music program in each school must not only provide general experiences in music for ALL students but should also make available for those students with special musical ability additional opportunities for participation in selected instrumental and vocal groups.

Through participation in appropriate musical activities each child can, as he progresses through elementary and secondary school, learn to use music as another means of self-expression and as a personal enrichment for his own daily living.

Scope

The activities of the Music Education Service have been numerous and varied and represent work done in all sections of the State. Members of the staff visited in 77 county or city schools divisions during the 1956-57 school year and worked in 128 different schools.

The types of assistance rendered varied with the needs of the particular locality and included consulting with administrators, supervisors, and teachers regarding the organization, administration or evaluation of music activities, helping with materials and procedures of instruction; advising about curriculum, facilities and equipment; organizing and directing clinics, workshops, festivals and other in-service education projects for teachers; speaking to both lay and professional groups at State, area and local meetings; and providing other similar services which are related to the work being done in music in the schools of the State.

In addition to the above professional staff activities, one or more members of the Music Education staff attended and participated in State conferences for superintendents, supervisors, principals, visiting teachers, the Virginia Education Association, the Virginia Music Educators Association, and the Music Conference of the Virginia Teachers Association. They also took part in the evaluation of four high schools, attended and took part in State and district music festivals and clinics and made visits to several colleges and the University of Virginia.

The Supervisor of the Service served as President of the Northwest Division, Music Educators National Conference and as a member of the National Executive Committee of this same professional organization. The Assistant Supervisors attended and participated in sessions of the Eastern and Southern Divisions of the Music Educators National Conference.

Accomplishments

It is gratifying to note the continued growth in the kind and quality of musical experiences which are being provided for boys and girls in the schools of the State. This growth has been evidenced by the many requests for additional services which have come to the State Department Music Staff, the establishment of new music positions in some school divisions, the excellence of many performing groups appearing at various State meetings and in their own localities, and the response to numerous State-wide music projects sponsored by the Music Education Service in cooperation with other interested music organizations in the State.

The high quality of performance of the instrumental and choral groups as well as individual solo and ensemble performers has been noted particularly this year at the various district and State music festivals and clinics which have brought together more than 20,000 high school and junior high school students. The present plan of music festivals and clinics throughout the State has given great incentive to improving existing music organizations and has also aided materially in the establishment of music groups in schools where musical organizations have not previously existed. The Music Education Service is cooperating with the Virginia Music Educators Association in an evaluative study of festivals. From this study will come recommendations for continuing the major values of area festivals and clinics and at the same time offer suggestions for their improvement.

One of the unique projects organized and carried out each year by the Music Staff is the Virginia Music Camp. The 1957 Camp was the 18th such event and brought together more than 700 music teachers and talented music students from junior and senior high schools representing all areas of the State. The Camp provided an unusual opportunity for concentrated study on the part of both Virginia Music Educators and gifted high school musicians under the direction of outstanding guest conductors and consultants of national reputation. The

keynote of the workshop activities both for the instrumental and choral groups and teachers themselves was LEARNING BY DOING. The sessions, rehearsals and special classes emphasized individual participation to use and develop musical skill and understanding. It is believed that such participation results in immediate musical growth and that the person himself is inspired and challenged to continue this growth when he returns to his own local school and community. The Camp orchestra was in its second season and was comprised of 85 performers. The choral groups likewise had capacity enrollments and used all available facilities at Massanetta Springs. The culminating concert attracted parents and friends of music from many sections of the State.

The Music Education Service held a significant State conference on the certification of music teachers. This meeting brought together music educators from Virginia colleges and universities, and all levels of the public schools. The purpose of this conference was to evaluate present certification requirements in music and to make recommendations to the State Committee on Certification which is presently studying endorsement requirements in all subject areas.

Members of the Music Education Service also participated in a college and university music conference sponsored by the newly organized College Section of the Virginia Music Educators Association which was held on the campus of the University of Virginia. This conference helped music educators working in higher education to better understand the needs of the public schools as well as the importance of the proper preparation of teachers.

Visitations to schools have shown that commendable attention is being given to more adequate housing, equipment and materials for music activities. Many teachers are taking advantage of the inclusion of music materials on the State Library List and thereby expanding and enriching the kinds of musical activities which they provide for their classrooms.

Major Continuing Problems

The need for a consistent and well-planned music program in all elementary schools in Virginia.

The need for each classroom teacher to be adequately prepared to carry out his responsibility for music in the elementary schools.

The need for more usable music materials and activities appropriate for different grade levels.

There should be more pre-school conferences in which all new teachers participate in groups with the local music consultant or a special guest music educator; area conferences conducted by the Music Education Service; and extension courses in music and summer courses on college or university campuses.

The need for maintaining a balance in the types of musical offerings available to students at the high school level is a problem in some areas of the State.

It continues to be increasingly difficult to secure a sufficient number of well-prepared teachers of music to meet the needs of Virginia schools.

There is a need for additional curriculum materials in music to supplement the 1954 State Music Guide. There is a particular need at the moment for a publication dealing with the general music classes in the eighth grade and in the high school.

Division of Vocational Education

Vocational education has reference to specialized training for useful employment. Today vocational education is a unified process designed to develop in the individual those skills and understandings and qualities of mind and personality required for making a living and building a life.

The major purpose of the Division of Vocational Education is to assist the school divisions in developing an effective instructional program of vocational education for in-school and out-of-school students as an integral part of the program of education in the public schools. It is important, therefore, that the staff accept the responsibility of leadership in assisting the localities in reviewing and appraising the program of vocational education in the school divisions in light of current changes in technology, employment standards, and on-the-job training practices.

Reports of the activities of the services of the Division of Vocational Education for the fiscal year 1956-57 follow in this order: Vocational agriculture; business education; distributive education; home economics education (homemaking and school lunch); trade and industrial and industrial arts education; veterans education; and surplus property.

VOCATIONAL AGRICULTURE

Purpose

The general purpose of the Vocational Agriculture Service of the State Department of Education is to give leadership in the development and improvement of all phases of the vocational agricultural program including in-school boys, young and adult farmer groups. Since the general aim of vocational agriculture is to train present and prospective farmers for proficiency in farming, the primary function of the service is to assist school administrators and teachers in developing and improving the instructional program in vocational agriculture based on local needs of the students. This assistance is provided by the staff through (a) observation, (b) discussion, (c) on-farm instruction, (d) evaluation of local programs, (e) group conferences, (f) in-service training programs, (g) correspondence and other appropriate means. The staff, in cooperation with teacher training institutions, prepares instructional materials for use by teachers of vocational agriculture and assists in planning and conducting in-service training and teacher training programs for teachers.

Scope

During 1956-57 the staff of the Vocational Agriculture Service provided professional services to 246 high schools (188 white and 58 Negro) in 90 counties in which vocational agriculture was taught. In these schools a total of 10,160 in-school boys were enrolled in vocational agriculture classes; 2,496 out-of-school young farmers were enrolled in 177 Young Farmer classes and 919 veterans of the armed forces in 68 Institutional On-Farm Training classes. In addition 9,743 farm men and women were enrolled in 347 evening classes devoted to the discussion

of production, conservation and marketing of farm products. In 146 adult farm mechanics classes in the vocational agriculture shops, 8,218 persons received instruction in the operation, preventive maintenance, repair and construction of farm machinery. During 1956-57, 39,929 persons received instruction in 115 school community canneries in the production and conservation of foods for family consumption, a joint activity of vocational agriculture and home economics education.

Accomplishments

In-School Boys.—High school students enrolled in vocational agriculture carried out 31,690 supervised farming enterprises and 37,495 supplementary farm jobs. The 35,616 acres of crops, 29,427 head of livestock and 650,706 fowls carried as enterprises had a total supervised productive income of \$2,903,050.53.

Future Farmers of America-New Farmers of America.—The staff provided guidance for the Future Farmers of America and New Farmers of America, national organization of white and Negro boys, respectively, studying vocational agriculture in the high schools. During the year there were 187 chapters of Future Farmers of America with a membership of 7,940 boys, 58 chapters of New Farmers of America, with 2,600 members. Over 1,000 members attended the FFA Convention at Virginia Polytechnic Institute, June 17-20, and about 350 participated in the NFA Convention at Virginia State College, June 11-14.

The Vocational Agriculture Service staff in cooperation with the home economics education staff provided guidance and leadership in conducting the FFA-FHA Camp, located at Morgart's Beach, Virginia, and NFA-NHA Camp near Petersburg, Virginia. During the summer of 1956, a total of 1,553 boys and girls attended these camps which provided leadership training and recreation for rural boys and girls.

Young Farmer Classes.—Young Farmers enrolled in organized classes carried out 13,378 improved practices, cultivated 127,669 acres of crops, maintained 59,595 head of livestock and raised 654,497 head of poultry. The staff provided guidance for a State-wide Young Farmer Convention held in Richmond, February 15-16. At this convention, over 440 Young Farmers and their wives discussed common problems and made plans for expanding and improving the young farmer training program. In cooperation with Home Economics Education Service, formation of Young Homemakers of Virginia as a sister and auxiliary organization of the Young Farmers of Virginia was completed during the convention. The staff supervised the training program for 919 students enrolled in 68 Institutional On-Farm Training classes for veterans of the armed forces.

Farm Families.—Evening class members for adults carried out 52,796 improved practices on their home farms. Members of farm mechanics classes repaired, overhauled, rebuilt and/or constructed 42,072 items of farm equipment and implements.

Effective instruction in the production and conservation of food was promoted by the cooperative efforts of the staff and teachers of vocational agriculture and home economics. Persons receiving instruction in the preservation of food for family consumption processed in school community canneries, the equivalent of 4,730,309 pints of food.

Conferences and Workshops.—During the year Vocational Agriculture Service assumed leadership in conducting a number of State, area and group conferences as one means of providing in-service training for teachers of vocational agriculture.

1. A State-wide conference for white teachers of vocational agriculture in conjunction with a joint conference on vocational education was held at Virginia Polytechnic Institute, August 13-17 on the theme "Vocational Education for Youth and Adults in a Changing World." Two State conferences for Negro teachers of vocational agriculture were held during the fiscal year at Virginia State College, July 23-27, 1956 on the theme "A United Approach to Common Problems in Vocational Education", and June 24-28, 1957 on the theme "Conducting On-Farm Instruction." Both conferences for Negro teachers were held jointly with other vocational teachers.

Major Continuing Problems

1. A teaching schedule which will provide adequate time for the teacher to conduct organized classes for out-of-school young farmers and adult farmers.
2. A teaching schedule which will provide adequate time for the teacher to give the essential on-farm instruction to students enrolled in in-school, young farmer and adult farmer classes.
3. A well planned program of summer activities and schedule of work, of the teachers approved by the division superintendent and high school principal.
4. Use of Advisory Councils by teachers.
5. Determining the scope of teacher participation in State and county programs of work.

*School-community canneries.

†Does not include Day Unit or Veterans Training reported in previous years.

131,556 of the 39,929 here shown as enrolled for food conservation were served jointly by Agriculture and Home Economics teachers and are shown also in the Home Economics report.

Note: Ninety counties were served by the State program of vocational agriculture.

BUSINESS EDUCATION**Purpose**

Business Education has two major functions in the public schools: (1) To train-in-school and out-of-school youths and adults for vocational competence in office occupations and managerial positions, and (2) to provide economic education necessary for effective living in our business society. The Business Education Service accepts as its major function the improvement of instructional activities in business education at the secondary school, post-high school, adult, and teacher education levels through the following activities: Working with classroom business teachers on problems of curriculum, course content, instruction, standards, and classroom management through periodic visitations, observations, conferences, and professional materials; maintaining continuous consultative services to superintendents, principals, directors of instruction, and other school administrative personnel; working in close cooperation with pre-service business teacher education programs at State-supported colleges on both the undergraduate and graduate levels; working closely with organizations of business men and women in order to keep the school program up to date on current business practice; in cooperation with classroom teachers, developing curriculum guides for various subject matter fields in business education; promoting leadership activities among high school business students and business teacher-education students through the development of chapters of the Future Business Leaders of America.

Scope

In-School Program.—During the 1956-57 school session, business education subjects were offered in 408 schools and 805 business teachers were employed by local school divisions.

Post-High School Programs.—The Business Education Service promotes and works actively to provide full time post-high school programs in business education for high school graduates and adults. The Danville Technical Institute, Washington County Technical School, and Woodrow Wilson Technical School enrolled 291 pupils and employed 10 teachers during the 1956-57 session. The Woodrow Wilson Technical School also provides vocational training in office occupations for rehabilitation clients who are attending the Woodrow Wilson Rehabilitation Center.

Adult Evening School Programs.—Adult evening school classes are offered in many school divisions for the purposes of: (1) preparing beginning office workers, (2) up-grading adult workers, and (3) retraining employed workers for changes in occupational duties or status. This year, for the first time, two in-service training clinics were offered for office managers and supervisors and one class for clerical personnel.

Vocational Office Training.—Vocational office training is the cooperative part-time work training program in business education. During their senior year, students enrolled in this program are in regular school classes for a half day and are employed in appropriate business offices of the community for approximately a half day. A business teacher-coordinator is responsible for the coordination of the learning activities in school and on the job. In 1956-57, this program was offered in 39 high schools, one college, and one technical school and enrolled 732 students.

Accomplishments

1. Held annual Advisory Conference on Teacher Education for the purpose of revising the business teacher-certification requirements.
2. Expanded the Vocational Office Training Program to include four additional schools.
3. Held summer training conference for FBLA members and sponsors.
4. Conducted a research study through FBLA: "Follow-up Study of 1954 Business Education Graduates."
5. Participated in in-service training conferences for vocational teachers at Virginia State College and at Virginia Polytechnic Institute.
6. Published two issues of *Virginia Business Education Bulletin*.
7. Prepared and presented revised business teacher certification requirements to the State Teacher Certification Committee.
8. Promoted and helped to organize four Area Advisory Councils on Business and Education at Roanoke, Norfolk, Richmond, and Northern Virginia.
9. Conducted four in-service training conferences for business teachers.
10. Inaugurated three in-service training clinics for office managers and supervisors in the Richmond area.

Major Continuing Problems

1. The extension of the contacts of Business Education Service to more local high schools and improvement in the effectiveness of the Service in working with local school personnel.
2. Revision and publication of Parts I and V of the present Course of Study, the development of Part VI, and publication of Part III.
3. Improvement of housing and instructional equipment necessary for an adequate vocational program in business education.
4. Improvement in the offering of courses on the office management and supervisory levels of adult education.
5. Improvement of course content and instructional procedures in economic education and the extension of this education to more students.
6. Professionalization of business teachers through graduate study, attendance at professional conferences and workshops, membership in professional organizations, and contributions to professional literature.

DISTRIBUTIVE EDUCATION

Purpose

The purpose of distributive education is to provide vocational training for individuals who are or will be engaged in distributing goods and services to the public, including all retail, wholesale and service occupations. The over-all purpose of the Distributive Education Service is the improvement of instructional activities in this field at the secondary school, adult, and teacher education levels through the following activities: Working with distributive education coordinators, individually and in groups, on problems of curriculum, instruction, standards, and classroom management; maintaining continuous consultative services to superintendents, principals, directors of instruction, and other school administrative personnel; working in close cooperation with pre-service distributive education coordinator programs at State-supported colleges on both undergraduate and graduate levels; developing curriculum guides for subject matter fields; promoting leadership activities for high school distributive education students and teacher education students through the development of chapters of Distributive Education Clubs of America.

Scope

Cooperative Part-Time Classes.—These classes are offered to high school juniors and seniors. Students take DE I (basic course) in the junior year and DE II (advanced course) in the senior year. Each student works in a distributive occupation which has been approved by the teacher-coordinator as a bona fide training station. Here he receives careful supervision and training on the job by his sponsor working with the coordinator. He is paid the prevailing wage for part-time beginning workers and is employed a minimum of fifteen hours a week.

During the 1956-57 school year, 73 high schools and 2 junior colleges in 66 communities offered the cooperative part-time program with a total enrollment of 1,848 students. These students earned a total of \$997,671.97 during the school year.

Cooperative Part-Time Classes Between Two Vocational Services.—This type of high school cooperative program is offered in order to make distributive and other vocational training available to students in rural high schools in the State. Where enrollment and placement opportunities are too small to justify any one work-training program on a full-time basis, one coordinator is employed to handle two work-training programs, which in most instances are distributive education and diversified occupations. Under this arrangement clear-cut identity is maintained between the two programs and they are taught in separate groups in the school and separate curriculum is used.

Continued growth and expansion within five of these programs resulted in the need for converting them to full-time operation with a coordinator in charge of each phase of the program. Two new programs of this type were established during the 1956-57 school year, making a total of 22 in the State.

Evening and Part-Time Extension Classes.—These classes are designed to improve the skill, technical knowledge and occupational information of out-of-school youth and adults employed in distributive occupations. Training is offered on both the management and employee level in retail, wholesale and service

establishments. Each local DE coordinator is responsible for organizing this phase of the program. During the past year, a total of 5,719 persons received training through these evening and part-time extension classes. A total of 294 classes were offered in 67 communities in the State.

Part-Time Preparatory Classes.—These are classes for high school and adult distributive persons to prepare them for successful entrance into distributive occupations. They are offered primarily during peak seasons such as Christmas and Easter and also in the spring as an orientation for new students in the high school cooperative program to prepare them for summer employment. Classes of this type were offered in 41 high schools in the State this year with 1,202 persons receiving training for entrance into distributive occupations.

Distributive Education Clubs of America.—The Distributive Education Clubs of America (DECA) is the national organization for students enrolled in high school distributive education classes. The primary objectives of every local chapter are: (1) to provide students with opportunities to develop qualities of leadership; (2) to further develop special skills and talents which they possess; (3) to increase their knowledge of their chosen profession; and (4) to provide satisfactory social and recreational activities. DECA activities constitute a major portion of the students' classroom training and are planned as an integral part of the teaching program. The Virginia Association is a charter member of DECA and has always played a dominant role in the growth of this youth organization.

Accomplishments

1. The High School Program

- a. To keep abreast of expanding career opportunities in distribution, a new plan was developed for teaching the high school curriculum. The "Areas of Study Concept," as it is called, gives a much broader approach to the curriculum and increases flexibility in meeting the needs of individual students.
- b. Two of the high school units of study, "Visual Merchandising" and "Retail Advertising," were revised and published in printed form.
- c. A new guidance leaflet describing the high school program and career opportunities in distribution was developed and printed.

2. The Adult Program

- a. The first State-wide Service Station Management Institute was offered with 29 station dealers representing 6 major oil companies attending. The four-day session was organized in cooperation with the petroleum industry in Virginia and was held on campus at Richmond Professional Institute. State and national leaders appeared on the program dealing with such important topics as training, sales promotion, business trends, station management, credit and supervision.
- b. Local training programs in the petroleum field were also continued and expanded in cooperation with the Virginia Petroleum Jobbers Association. Special classes were offered in 17 communities with

approximately 350 station dealers receiving training in such areas as record keeping, how to train, insurance, how to supervise, and station operation.

- c. Through a similar arrangement with other trade associations in the State, special training programs were offered in such fields as laundry and dry cleaning, hardware, insurance, real estate, tourist and food service, wallpaper and automotive.
- d. By special arrangement with Richmond Professional Institute, training specialists from the School of Distribution staff were made available during the year to conduct special clinics and short courses throughout the State when requested by coordinators. These clinics dealt with specialized areas such as display, textiles, personnel selection and training, brainstorming and automotive management. Over 600 businessmen received training through these clinics.
- e. The Small Business Management Institute was greatly expanded, being offered in 9 additional communities with over 400 owners and managers participating. In one community a follow-up institute entitled "Increasing Profits from Small Business" was organized with 32 managers receiving their second certificate for completing this advanced phase of the program. A pilot study is also underway to offer some sections of the institute as "early bird" morning sessions to be conducted in various shopping centers that dot the periphery of the city. A manual dealing with promotion and organization of institutes was published and will be distributed nationally.
- f. Through the cooperation of 23 trade associations and the School of Distribution, Richmond Professional Institute, the annual Conference on Distribution was held again this year with over 200 businessmen throughout the State participating in the one-day session. State and national leaders participated on the program to introduce "brainstorming" the newest technique for training in distribution.

3. Teacher Training

- a. A considerably broader approach to teacher training was developed and carried out during the year. By special arrangement with Richmond Professional Institute and Virginia Polytechnic Institute, teacher trainers and training specialists from the staff at these two institutions assisted in conducting a series of coordinators' workshops dealing with important phases of the high school and adult program. As a result of this cooperative effort, a series of five workshops were offered in each section of the State, each ranging from four to seven hours in length.
- b. The graduate program offering a Master of Science degree in Distributive Education was reorganized at Richmond Professional Institute to meet the growing demand for qualified coordinators in the State. Professional and technical courses included in the program will also aid present and future coordinators in becoming certified or renewing certificates.

4. **Public Relations**

- a. Merchant committees were organized at the district level for the first time in an effort to secure more direct assistance from businessmen in planning and organizing local programs. Two such committees were organized during the year and served as subcommittees to the State DE Coordinating Committee.
- b. The 20th Anniversary Celebration marking the beginning of distributive education in Virginia was held in Waynesboro on May 13. Several members of the original merchants' committee and a number of persons enrolled in the first distributive education adult class held in the State were on hand for the affair.
- c. Steps were taken to offer the services of State staff members as consultants in district meetings of the State Association of Secondary School Principals.

5. **Distributive Education Clubs of America**

The first annual training session for DE Club State Officers was held and resulted in considerable improvement in local, State and district club activities under the leadership of these officers. The recently expanded State Club Advisory Committee composed of coordinators assisted with the training session and served as advisors to the officers throughout the year.

Major Continuing Problems

1. How to work with school administrators in better serving the needs of the large number of high school students who are already working part-time in distributive occupations but are not enrolled in distributive education.
2. Lack of understanding on the part of school administrators in some areas that distributive education for adults is a vital and necessary adjunct to a successful high school program and that approximately one-half of the coordinator's time should be devoted to this phase of the program.
3. Need for better understanding on the part of coordinators and school administrators in some areas as to how the distributive education coordinator can assume his share of regular high school duties and at the same time operate a successful high school and adult distributive education program.
4. Developing ways to work with local, State and national trade associations in meeting the increasing need and demand for specialized training programs in specific areas of distribution.

TABLE 11—SUMMARY OF WORK IN DISTRIBUTIVE EDUCATION—1940-1957

*Most of these teachers are employed on part-time basis.

HOME ECONOMICS

Purpose

The general purpose of the Home Economics Education Service is to give leadership in the development of programs in homemaking education and school lunch, to serve as a resource aid to school divisions in the development of these programs and to cooperate with the colleges in providing pre-service and in-service education of homemaking teachers and school lunch personnel.

Homemaking Education

In homemaking education, the staff serves the school personnel responsible for the development of homemaking education programs in the following ways: (a) assisting in planning and evaluating homemaking programs; (b) serving as a resource in organization and administration of homemaking programs; (c) conducting workshops and conferences; (d) cooperating in developing the homemaking curriculum; (e) reviewing plans for new and renovated departments and setting up standards for equipment; (f) evaluating teaching methods; (g) providing guidance for the youth organizations, Virginia Association of Future Homemakers of America and New Homemakers of America; and (h) working cooperatively with the staffs of the eight colleges approved for the training of home economics teachers.

Scope

In 1956-57 homemaking education was offered in 433 high schools and junior high schools in 97 counties and 31 cities in the State; the number of teachers serving these schools was 628. Vocational homemaking programs were carried on in 391 high schools by 549 homemaking teachers. Of these 549 teachers, 250 were employed for 10 months; 70 for 11 months, and 229 for 12 months. Reached through organized classes in all phases of the program were 58,980 in-school pupils and 35,831 adult homemakers.

Accomplishments

In carrying out responsibilities, staff members participated in 212 group meetings of homemaking teachers, principals and directors of instruction for the purpose of giving assistance in planning, developing and evaluating local homemaking programs. Supervisory visits, totaling 947, were made to schools for the purpose of working with homemaking teachers. Homemaking programs were evaluated in 76 schools. Other accomplishments were:

Conferences and Workshops.—

1. Staff members participated in planning and carrying out two joint conferences for teachers in all fields of vocational education. One conference was held at Virginia Polytechnic Institute, August 13-17; the theme was "Vocational and Practical Arts Education for Youth and Adults in a Changing World." A second conference was held at Virginia State College, July 23-27; the theme for this conference was "A United Approach to Common Problems in Vocational Education." Opportunities were provided for all Services in the Department of Vocational Education

to consider cooperatively mutual problems and challenges in the program of vocational education. As a part of these conferences, homemaking teachers worked as a group on curriculum development with special emphasis on home projects in homemaking and homemaking education for adults.

2. Two State-wide leadership training meetings were held for representatives of chapters of the Virginia Associations, Future Homemakers of America and New Homemakers of America. The theme for the conference of the Future Homemakers, held at Radford College, June 10-13, was "Future Homemakers Working for a Safe and Secure World." The theme for the conference of the New Homemakers of America, held at Virginia State College, June 11-14, was "New Homemakers Prepare Today to Meet the Challenges of Tomorrow".
3. Staff members continued to assist homemaking teachers in work on "Provision and Use of Running Water in the Home". Workshops for homemaking teachers were conducted in two sections of the State, in cooperation with the Virginia Farm Electrification Council. The Council provided resource persons for the workshops.
4. Four workshops in Food Production and Conservation were conducted by members of the homemaking education staff in cooperation with members of the staff of the Vocational Agriculture Service. Instruction included planning food production and conservation for the year to meet family needs, desirable practices in food production and conservation and management of the school-community canneries.

Curriculum Development.—The homemaking education staff continued work on the development of the homemaking curriculum. Suggestions made by 300 homemaking teachers, following their try-outs in 1955-56 of the tentative *Course of Study in Homemaking Education, Grades 8-12*, were incorporated into the materials which are being prepared for publication. Staff members conducted 76 meetings of homemaking teachers to assist with the use of these materials in developing local programs in homemaking.

Homemaking Education for Adults.—Supervisors worked with teachers in developing homemaking programs for adults. Some of the areas in which instruction was given were: Home improvement, food for the family, family finance, child development, health and home care of the sick, clothing for the family, family relationships, housing, family recreation and home management. Instruction was provided through:

General Homemaking classes reaching 4,275 adults in 155 centers; and
Food Production and Conservation classes, planned and developed with Vocational Agriculture Service, enrolling 31,556 individuals in 90 centers.

Supervisors served as consultants to members of Young Homemaker groups and their homemaking-teacher-advisers in forming a State organization, the Young Homemakers of Virginia. At a State meeting in February, held in conjunction with the Young Farmers of Virginia, the first officers of the new organization were elected and a State constitution was adopted. Work with Young Homemaker groups provides additional opportunities for extending education in home and family living to adult groups.

Planning and Equipping Homemaking Departments.—The staff assisted school divisions in planning and equipping new homemaking departments through evaluating layouts, setting up standards for purchasing equipment, preparing budgets for equipment needed and selecting equipment. Supervisors assisted in reviewing plans for homemaking departments in 12 new buildings and 7 remodeled buildings and assisted in planning for and selecting equipment for homemaking departments in 102 schools.

Future Homemakers of America—New Homemakers of America.—Guidance was given to the 271 chapters of the Virginia Association, Future Homemakers of America, with a membership of 13,949, and to the 92 chapters of the Virginia Association, New Homemakers of America, with a membership of 3,785. In addition to serving as consultants in the organization of two conferences of the Future Homemakers of America and the New Homemakers of America, staff members assisted with 70 meetings of federations; participated in 69 meetings of State committees; met with representatives of 198 chapters to help with program development; served as consultants in reviewing the year's plans of work of 363 chapters; and assisted with over-all management for the FFA-FHA Camp and the NFA-NHA Camp in cooperation with the Vocational Agriculture Service. During the 1956 season, 1,553 boys and girls attended the camps and took part in the leadership training and group recreation opportunities afforded by the programs.

Cooperative Work with Colleges.—Members of the staff of the Home Economics Education Service cooperated with the eight colleges offering majors in home economics education on undergraduate and graduate levels. Nineteen visits were made by staff members to the colleges to discuss with college staffs strengths and weaknesses in work of graduates and to talk with students enrolled in the home economics departments concerning opportunities open to graduates properly certified in home economics education.

Undergraduate.—The heads of home economics departments in the eight colleges approved by the State Board of Education for the training of home economics teachers met January 11, in Richmond, with members of the State staff to discuss proposed changes in certification requirements for the endorsement of the Collegiate Professional Certificate for teaching home economics in Virginia.

A two-day workshop was conducted for instructors in Housing and Home Management in colleges approved for training home economics teachers on the "Use of Electricity in the Home", with the cooperation of the Virginia Farm Electrification Council. The purpose of the workshop was to discuss problems faced by families in using electricity in the home, how assistance may be given in meeting these needs and planning college courses in housing and equipment to include problems in the use of electricity in the home.

A three-day workshop was held February 7-9, in Richmond, for college supervisors of student teaching in homemaking education and the teachers from secondary schools in which directed teaching experiences were provided for home economics education majors. The meeting was concerned with helping cooperating teachers who were working with student teachers for the first time to get a better understanding of the goals for teacher education in the student teaching program. The total group worked on the production of materials needed to aid in the develop-

ment of the student teacher program in addition to those provided in "Student Teaching, a Reprint of the Cooperative Study of Student Teaching in Virginia", April 1956.

Graduate.—The State Supervisor and members of the staff have worked closely with the graduate program in home economics education so that this program may render maximum assistance to the homemaking teachers in the State. Types of cooperative work included (a) discovering and analyzing needs of homemaking teachers for further study; (b) planning courses designed to meet the needs of teachers; (c) effecting the organization of off-campus classes; and (d) suggesting types of research needed in the development of the homemaking education program in the State and cooperating in determining ways and means of implementing this research.

Major Continuing Problems

Problems of concern include: Recognizing the importance of adult classes in homemaking and including such classes as a part of local homemaking education programs; increasing opportunities of pupils to enroll in homemaking classes in the latter years of the high school program; developing extended programs during the summer months for in-school pupils and adults; and encouraging greater emphasis on developing teaching materials.

^{***}This phase of the program is conducted jointly by Home Economics and Agriculture. The enrollment figures are included each year in the report of the Vocational Agriculture Service.

School Lunch

The staff members responsible for giving leadership and assisting school divisions in the development of the school lunch program work as follows: (a) assist in planning and developing school lunch operations; (b) aid in administering and evaluating programs; (c) conduct workshops and conferences for the professional improvement of school lunch personnel; (d) initiate study groups for work on improving standards of operation; (e) review school building plans to assist in determining adequacy of lunchroom facilities; (f) select and distribute material of help to school lunch managers in improving program operations.

Scope

During the 1956-57 school session, 1,569 schools served lunches to an average of 301,222 pupils daily and milk to many more pupils. All except 18 of these schools received assistance from National School Lunch and Special Milk Programs. The total expenditure covering the operational costs for the school lunch and Special Milk programs for the State for 1956-57 is estimated to be in excess of \$18,500,000.00.

National School Lunch Program.—A total of 1,333 schools were approved for participation in the National School Lunch Program and received \$2,008,870.00 in food reimbursement for 48,694,546 lunches. These funds were used in serving lunches to a daily average of 270,418 pupils for 176 days. The peak average daily participation of 280,668 was in November 1956 and the lowest participation was 262,504 in May 1957.

The U. S. Department of Agriculture through the State Department of Agriculture, Division of Markets, distributed commodities to 1,401 schools valued at \$3,208,198.40. These commodities were used both in serving complete lunches, and in providing supplemental lunches where preparation facilities in schools were lacking. Approximately 325,000 pupils benefited from these foods.

Special Milk Program.—The Special Milk Program, which has as its purpose increasing fluid milk consumption among children and expanding dairy markets, was established in 1954 by the Congress by an amendment to the Agriculture Act of 1949. Application-agreements for participation in this program were signed by 95 counties and 29 cities, for a total of 1,353 schools. Of this number 218 schools were not participating in the National School Lunch Program. Under the Special Milk Program schools received reimbursement in the amount of \$1,069,799.20 for 30,916,622 one-half pints of milk over and above that served as part of the complete lunch.

Accomplishments

Outstanding accomplishments in light of goals for the school lunch program include:

GROWTH OF PROGRAM.—The number of schools under Federal programs serving lunches and/or milk increased from 1,538 in 1955-56 to 1,569 in 1956-57. There was an increase of more than 4,865,500 complete lunches served during the year.

The most encouraging aspect of the Special Milk Program is that many schools have lowered the price of milk to pupils and thus have greatly in-

creased milk purchases by pupils. During the year 5,541,995 more one-half pints of milk were sold in schools than in the 1955-56 term.

IMPROVED NUTRITIONAL ADEQUACY OF LUNCHESES.—Records show that a larger percentage of schools than previously have served lunches which meet the minimum food standards of the Type A lunch, especially in terms of protein rich foods and of butter. Acceptance of new foods by pupils has been noted in many schools. Schools are continuing to eliminate the sale of soft drinks and of resale items which compete with the more nutritious foods served in the lunch rooms.

PROFESSIONAL IMPROVEMENT.—During the year interest on the part of school lunch personnel in training opportunities has continued to increase. School administrators have become more aware of the advantages of better trained and better qualified managers, who can assume the major responsibility of the operation of the lunch program. Two State-wide conferences, study groups, and local conferences were conducted, with a total of 89 being reported and an attendance of 2,830 persons.

IMPROVED FACILITIES FOR SCHOOL LUNCH PROGRAM.—Significant improvement has been noted in equipment and storage facilities in lunchrooms. In new and renovated buildings tax funds are being used almost entirely to provide for these facilities. Less dependence is being placed on securing funds from other local sources.

Major Continuing Problems

It is recognized that much progress has been made in the development of lunch and milk programs, yet the following problems need continued attention:

Providing training on all levels.

Increasing the number of schools serving lunches and/or milk.

Increasing participation in schools now operating lunch and milk programs.

Holding participation averages in the lunch program during the spring months.

Reducing the price of milk to pupils in schools charging five cents or more per one-half pint.

Improving the quality of lunches and services.

Improving and maintaining sanitation standards of operation.

Improving the procedures of financial operation, record keeping and reporting in some schools.

Improving physical facilities in some schools.

TRADE AND INDUSTRIAL AND INDUSTRIAL ARTS EDUCATION

Purpose

The major purpose of trade and industrial education is to provide instruction of a preparatory nature designed to prepare persons for useful employment; and instruction of a supplemental type for persons already employed in trade and industrial pursuits. The major purpose of industrial arts education is to provide instruction and experience involving the materials, processes and products of industry. The learning comes through student activity with tools and materials. It also establishes a basis for intelligent guidance leading into the trade and industrial program. The over-all purpose of the Trade and Industrial Education Service is the improvement of instructional activities in trade and industrial and industrial arts education. This is done through the following activities: (1) Working with local supervisors, coordinators and instructors individually and in groups on problems of course content, instructional methods, shop and laboratory organization and management, and maintaining standards, (2) offering consultative services to superintendents, principals and directors of instruction, (3) cooperating with teacher-training institutions training personnel in organizing undergraduate and graduate programs, (4) working with committees of instructors, coordinators, and supervisors in the development of study guides, courses of study, brochures, bulletins and teaching aids, (5) working with various municipal, county, State and Federal officials in conducting special courses for employees in many of the public service occupations, (6) working with industrial employers in organizing and administering supervisory in-service training courses.

Scope

Ninety-three school divisions provided offerings in trade and industrial and industrial arts education during the school year 1956-1957. These offerings included the following type programs designed to serve the training needs of individual trade and industrial workers and high school youth interested in industrial education.

IN-SCHOOL PROGRAM

Day Trade Classes.—These classes are for persons who have selected a trade or industrial pursuit, and who wish to be prepared for useful employment in that field. The training given was comprehensive in nature, including instruction in manipulative processes, technical information and other related subjects which are needed by the skilled and competent worker. Three thousand two hundred fifty high school students were enrolled in these classes. Major areas of instruction were auto mechanics, auto body repair and painting, cabinetmaking, carpentry, cosmetology, drafting, electricity, electronics, machine shop, masonry, practical nursing, printing, sheet metalwork and welding.

Part-Time Cooperative (Diversified Occupations).—This program is designed for high school juniors and seniors. The students, all of whom were sixteen years of age or older, attended school one half of each school day and received work experience on the job in some trade or industrial occupation the other half of the school day. Diversified Occupations provided the students with a choice of employment objectives from a wide variety of trade and industrial pursuits. Systematic training was given on the job and supplementary instruction related

to the training was given in the high school. Nine hundred thirty-seven high school students received training in this program.

Industrial Arts.—Industrial arts has general values that apply to all levels of instruction. Students were provided opportunities to design and construct projects and solve problems whereby they acquired understandings and skills essential to their avocational or vocational interests. Industrial arts was offered in 188 high schools. The total enrollment including grades eight through twelve was 33,003.

OUT-OF-SCHOOL-PROGRAM

Evening Trade Extension Classes.—These classes are for employed workers who wish to increase their skill and knowledge in the trade or industrial occupation in which they presently are or have been engaged. These courses offered related instruction for apprentices as well as other workers in skilled and semi-skilled occupations. They provided instruction designed to increase the knowledge or skills of workers in trade and industrial pursuits. Ten thousand nine hundred forty-one persons received instruction through these classes.

Day Trade Classes.—These classes are for persons over sixteen years of age who have left school and who are physically able and mentally competent to profit by the instruction and training provided. Trade training and technical information were offered at the regional and area vocational-technical schools of the State and at several local school divisions. Students enrolled in trade classes prepared to become skilled craftsmen while those in technical classes prepared for employment as technicians and professional and engineering assistants. Major areas of instruction and operational procedure used on this post high school program were similar to those used in the high school program. Additional courses of a technical nature were provided on this level. Instruction was given to 2,207 students.

Foremen and Supervisory Training Classes.—The objective of this type of training is to upgrade foremen, supervisors, and other minor executives by increasing their supervisory, teaching and managerial abilities. Four hundred four persons were enrolled in 26 classes in 7 different school divisions.

Public Service Training.—Classes were provided for public service employees including firemen, policemen, surveyors, municipal managers, and building, plumbing, and electrical inspectors. These courses were designed to increase the skills and technical knowledge of the individual engaged in these specialized occupations. Some of the activities provided were: Eight zone fire schools enrolling 666 persons, three State fire schools enrolling 529 persons, 19 local fire schools enrolling 493 persons, three State police schools enrolling 187 persons and a land surveyors' school enrolling 48 persons. Special institutes were held for municipal managers, State police chiefs, State fire chiefs, sealers of weights and measures, and building, plumbing and electrical inspectors. These programs provided training for 554 persons. A total of 2,477 persons participated in public service training.

On-the-Job Training for Employees of Virginia Electric Cooperatives.—Sixteen cooperatives participated in the State-wide training and accident prevention programs in which 562 persons received training.

Apprentice Training.—Related instruction was provided for apprentices in the regular trade extension classes and in classes conducted under the group study plan in communities where it was necessary for persons from two or more trades to attend the same class. A total of 1,633 apprentices representing 56 different trades were given instruction. These classes were held in 44 different centers throughout the State.

Industrial Arts.—In many school divisions industrial arts was offered to adults on an avocational basis. Activities included: Cabinet making, furniture refinishing, ceramics, jewelry work and leather craft.

Accomplishments

1. Two State-wide trade and industrial education conferences were conducted in cooperation with the division of vocational education. They were held at Virginia Polytechnic Institute and Virginia State College.
2. Five one-day area workshops were conducted for coordinators of related instruction for apprentices.
3. An in-service training program was conducted by the trade and industrial education teacher-trainer in two different centers.
4. Local zone and State fire schools were conducted in cooperation with the State Association of Fire Chiefs and the State Fireman's Association.
5. Central police schools were conducted in cooperation with the Police Chiefs' Association.
6. A teacher-training program for trade and industrial education personnel was established at Virginia Polytechnic Institute.
7. Two supervisory training institutes on a State level were conducted for trainers of supervisors in industry, one for women who held supervisory positions and one for men who were potential trainers of supervisors.
8. Two State conventions were held for the Diversified Occupations Clubs of Virginia, one at Virginia Beach and one at Petersburg.
9. Eight area workshops of ten hours each were held for coordinators of diversified occupations.
10. Two pre-service training sessions for new coordinators were held, one for 12 hours and one for 24 hours.
11. Four diversified occupations programs were added to the total program of trade and industrial education.
12. A new diversified occupations brochure, "Facts About the Diversified Occupations Program in Virginia" was developed.
13. Six area conferences were conducted for industrial arts teachers throughout the State.
14. A State organization of Student Industrial Arts Clubs was started. Six local clubs were formed and completed a year of successful activity.
15. A trade and industrial office was opened in Abingdon, Virginia to serve the total program in southwest Virginia.

16. The State Advisory Committee for Trade and Industrial Education met and made plans for future activity.
17. Three two-day conferences were held for local supervisors of trade and industrial and industrial arts education and principals of vocational-technical schools.
18. One fire fighting specialist was added to increase the efficiency of this service.
19. A curriculum development workshop was held for practical nurse instructresses.

Major Continuing Problems

There is a need for an expanded technical institute program for the training of technicians.

As each phase of the trade and industrial program continues to grow, there is an increasingly greater need for research and the development of instructional materials.

The problem of providing adequate related instruction for the isolated apprentice continues.

The need for providing vocational-technical training for the youth of non-urban areas is increasing.

*These are part-time teachers.

VETERANS EDUCATION

The State Department of Education is the Approving Agency for institutional, on-the-job, and apprentice training of veterans of World War II under the provisions of Public Law 346, 78th Congress, as amended, and for veterans of the Korean conflict under the provisions of Public Law 550, 82nd Congress. The State Department of Education is also the Approving Agency for institutional, on-the-farm training under the provisions of Public Law 550. The Committee on Veterans Education has established policies to be followed by the Executive Officer of the Committee in carrying out the provisions of the law in accordance with fundamental principles of education. It is the purpose of the Approving Agency to approve only such institutions, establishments, and courses that will offer a sound program of training and education to veterans.

On-the-Job Training.—During the year the Committee received 735 applications for approval for apprenticeship and on-the-job training from establishments in the State which were processed as follows:

Approvals.....	571
Disapprovals.....	153
Not processed by July 1, 1957.....	11
Total.....	735

The following changes were made during the year in the number of establishments approved for training:

Number of establishments approved as of July 1, 1956.....	1,279
Number of establishments approved during the year.....	534
Number of establishments withdrawn from approval during year.....	717
Total number of establishments approved as of June 30, 1957.....	1,096

All establishments approved provided a schedule of training showing items of in-service training with hours given to each, supplementary training within the establishment, wage schedule, and at least 144 hours per year of Related Training in an approved institution, usually the public schools. The District Supervisors served as coordinators of the training in the firm with the Related Training.

During the fiscal year, the District Supervisors made 1,528 visits to firms approved to provide on-the-job training to veterans.

Apprentice Training.—The Apprenticeship Council of the State Department of Labor and Industry cooperates with the Committee on Veterans Education by investigating the facilities of establishments desiring to give training in apprenticeable classifications and by recommending approval to the Committee on Veterans Education. The District Supervisors served as coordinators of the apprentice training in the establishment with the required Related Training, and 1,142 visits were made to firms approved for apprentice training.

Institutional Training.—The following types of institutions are approved for veterans training:

- (1) Virginia Institutions of Higher Education accredited by the State Board of Education.
- (2) Elementary and secondary State schools accredited by the State Board of Education.
- (3) Vocational schools accredited by the State Board of Education.
- (4) Hospitals approved by the Council of Medical Education and Hospitals of the American Medical Association.
- (5) Flight schools approved by the Civil Aeronautics Administration.

Private vocational schools must meet requirements for approval established by the Vocational Division of the State Department of Education and must have had at least two years' successful operation as a school within the State before approval can be given for veterans training.

During the year the Committee received 190 applications for approval for courses from institutions in the State which were processed as follows:

Approvals.....	154
Disapprovals.....	30
Not processed by July 1, 1957.....	6

The following changes were made during the year in the number of approved institutions:

Number of institutions approved as of July 1, 1956.....	209
Number of institutions approved during year.....	11
Number of institutions withdrawn from approval during year.....	5
Number of institutions approved as of June 30, 1957.....	215

The District Supervisors made 264 visits to public and proprietary institutions during the year.

Institutional On-Farm Training.—Under Public Law 550, the District Supervisors made 728 contacts with institutions and individual veterans pursuing on-farm training. A summary of the approval duties performed is as follows:

Number of institutional on-farm courses approved on July 1, 1956.....	1,097
Number of institutional on-farm courses approved during year.....	417
Number of institutional on-farm courses withdrawn from approval during year.....	722
Number of institutional on-farm courses approved as of June 30, 1957.....	892

SURPLUS PROPERTY

The State Educational Agency for Surplus Property has been designated as the Agency for the State of Virginia to perform those functions necessary in reviewing, securing, and allocating personal property, surplus to the needs of the executive agencies of the Federal Government, under the provisions of Public

Law 152, as amended, 81st Congress. Personal property which has been declared by General Services Administration to be surplus to the needs of the several executive agencies of the Federal Government can be donated to eligible claimants once it has been determined useable and necessary for educational, public health, and/or civil defense, including research in all three fields, by the Secretary of the Department of Health, Education, and Welfare.

With the enactment by the 84th Congress of Public Law 655, Federal surplus personal property was made available for donation to civil defense organizations. The State Agency in conjunction with the State Civil Defense Office established certain criteria within the framework of the Law and Federal regulations to determine the eligibility of local civil defense organizations. The State Civil Defense Office investigates each local civil defense organization and recommends to the State Agency the approval of those that qualify. A civil defense organization must designate one of the following purposes for acquiring any or all property: (1) civil defense training, (2) civil defense operational readiness and/or (3) civil defense reserve stock.

Most of the personal property that is made available to the State Agency is distributed from the warehouses located at Byrd Field, Richmond, Virginia. Certain types of property continue to be offered and allocated directly to eligible institutions from the holding agencies. This generally includes technical equipment, vehicles and heavy equipment, and other items which the State Agency feels it can best distribute in this manner. Surplus property is distributed primarily on the basis of need and the ability to utilize the property.

The State makes no appropriation for the operation of this Agency. To obtain its operating expenses, the State Agency places a small carrying charge based on a percentage of the Federal acquisition cost of the property allocated directly, and a packing and handling charge is attached to the property distributed from the warehouse.

For the school year of 1956-57, property with an acquisition cost of \$4,999,477.60 was requested by the State Agency both for the warehouse distribution program and for direct allocation to eligible participants. This represents an increase of \$192,915.90 over the previous school year. The acquisition cost of the property is used in the requests made by the State Agency because it is considered to be the most accurate means of evaluation. This eliminates the variances of human judgment in determining the present fair value.

From the total amount requested, \$2,225,946.76 was allocated directly to seven (7) city civil defense units, ten (10) county civil defense units, nineteen (19) city school boards, sixty-eight (68) county school boards, ten (10) State schools and colleges, sixteen (16) private schools and colleges, two (2) school systems operated by State Departments, eight (8) health units, and five (5) mental institutions. Three (3) city school boards, two (2) county school boards, two (2) private schools and colleges, one (1) State school or college, two (2) health units and one (1) mental institution were offered property at one time or another during the year but declined to request any of it.

The balance of \$2,773,530.81 was requested by the State Agency for distribution through its warehouse program. Eleven (11) city civil defense units, twelve (12) county civil defense units, twenty-three (23) city school boards, sixty-five (65) county school boards, sixteen (16) health units, seven (7) mental institutions, Richmond Diocese, Department of Education, thirty-three (33) private schools and colleges, four (4) schools operated by State Departments,

and twelve (12) State schools and colleges participated in the warehouse program by visiting it one or more times. The total number of visits made by these schools or institutions was six hundred seven (607).

The State Agency does not deal directly with the allocation of real property, but often gives advice and counseling services to the Department of Health, Education and Welfare, which is responsible for this function. Real property is available for donation for educational and health purposes only.

Division of Rehabilitation and Special Education

Many children and adults have characteristics that differ very widely from those of their associates. Some of these exceptional characteristics are results of severely impaired hearing or vision, amputated or disabled limbs, paralysis, muscular incoordination, seriously impaired speech, mental retardation, emotional instability and even mental superiority. Often these differences are so great that special means are required in preparation for useful, productive citizenship.

This Division concerns itself with the provision of facilities designed to enable these people to attain maximum realization of their potentialities.

The facilities are described in the reports of the Services of Special Education, Vocational Rehabilitation, Woodrow Wilson Rehabilitation Center, World War Orphan Education, Virginia School for the Deaf and the Blind, and Virginia State School which follow.

VOCATIONAL REHABILITATION

Purpose

Vocational Rehabilitation is a service of public education the purpose of which is to prepare for and adjust in appropriate trades or occupations persons of work age whose vocational opportunities are limited by reason of serious impairment or disability.

Each year thousands of our citizens are victims of disease, injury or congenital defect with the result that serious residual disabilities remain. Through individual case study and diagnosis, medical evaluation, vocational counseling, physical restoration, vocational training, job placement and follow-up, the disabled person is able to overcome his handicap and become self-supporting. The aid of many agencies, organizations and individuals in each community is invaluable in locating those in need of service and carrying out rehabilitation programs for those thus referred. Rehabilitation's purpose, in so far as it can, or may be needed, is to join in and supplement the community's effort to restore its disabled persons to lives of maximum usefulness.

Scope

During the year the field staff of the agency numbered 30 supervisors (counselors) working out of 13 field offices located for convenience and economy in the several sections of the State. Working on an individual case basis these supervisors investigate referrals, render counseling and planning service to cases, and provide necessary supervision during training and treatment, and placement service following completion of these services for those who need it. These field supervisors seek to coordinate the efforts of all those interested in the rehabilitation of the handicapped, and to bring into use all the resources of the community to meet the needs of their clients. Each school division in the State received Rehabilitation services during the year.

In addition to its other duties the Rehabilitation Service has been assigned responsibility for cooperating with the Federal Bureau of Old-Age and Survivors Insurance in the new Social Security Disability Insurance program. Applications

for such benefits are received by district Social Security offices and forwarded to the State Rehabilitation Service for investigation. Findings and the files are sent B.O.A.S.I. headquarters in Baltimore where action is taken. The Rehabilitation Service makes every possible effort to prepare these disabled applicants to return to self-supporting employment rather than accept disability benefit payments. In the year 4,942 applications were received and 3,633 were investigated and their files sent to Baltimore.

Referrals.—During the year 9,465 new referrals were received by the agency. This, with 3,328 carried over from the previous year, gave a total of 12,793 referrals to be investigated. During the year 8,817 of these cases were processed, resulting in 3,510 cases accepted for service and 5,307 rejected cases. Because of lack of staff time for investigation, 3,976 cases remained in referred status. Sources of referrals received during 1956-57 are as follows:

Public Welfare Agencies.....	1,602
Bureau of Old-Age and Survivors Insurance.....	1,630
Physicians.....	1,356
Public Schools.....	909
Hospitals and Health Agencies.....	985
Workmen's Compensation.....	649
State Employment Service.....	427
All Others.....	1,907

Status of Enrollment.—The total active roll for the year, including accepted cases and referrals, was 16,652. Of these 7,369 were active cases requiring attention, with the following results: Completed rehabilitation, 2,271; in process of rehabilitation but not completed, 3,072; closed without service after study, 786; undergoing plan development, 1,120; closed with service but unemployable, 102; transferred to other agencies, 18.

The Investment.—To support the program the Vocational Rehabilitation Service spent \$1,210,114.15, divided as follows:—For service to clients, \$1,166,409.68; for administration, \$43,704.47. Of the total, Federal funds amounted to \$762,033.45; State funds, \$448,080.70.

Accomplishments

In return for this investment, 5,452 disabled Virginia men and women were actively engaged in rehabilitation programs or had completed plans for entering programs during the year. Of these, 2,271 completed their preparation and went to work at wages aggregating \$3,969,500.00 for their first year of work following rehabilitation. In addition to their own support these 2,271 rehabilitated citizens are supporting 3,950 dependent members of their families.

The wages reported above do not include the earnings of 226 rehabilitated individuals who were reported to be farmers or housewives. They work in their own homes and on their own farms. The contribution of these persons to the care and support of their families is substantial, although not easily calculated in dollars and cents.

A study of the 2,721 cases whose rehabilitation was accomplished this year reveals the following facts:

Age: Under 21, 377; 21 to 23, 146; 24 to 29, 264; 30 to 35, 293; 36 to 41, 364; 42 to 47, 321; 48 to 59, 391; 60 and over, 115.

Sex: Male, 1,300; female, 971.

Marital Status: Single, 731; married, 1,058; other, 482.

Origin of Disability: Employment accidents, 190; other accidents, 302, disease, 1,585; congenital, 189; military or naval, 5.

Nature of Disability: Hand or hands, arm or arms amputated or disabled, 180; foot or feet, leg or legs amputated or disabled, 464; back disabled, 126; seriously defective vision, 59; arrested tuberculosis or other lung conditions, 163; impaired heart, 78; hernia, 215; defective hearing, 88; mental, 121; serious speech impairment, 34; epilepsy, 41; pelvic disorders, 295; miscellaneous disabilities, 407.

Schooling: None, 128; grades 1 to 3, 215; grades 4 to 6, 585; grades 7 to 9, 705; grades 10 to 12, 556; grades 13 to 14, 51; grades 15 to 16, 31.

Continuing Problems

One continuing problem considered appropriate for mention in this report is that of attitudes of employers toward hiring the handicapped.

We hasten to state that each succeeding year has brought marked improvement in these attitudes. More and more employers are coming to realize that they have relatively few physically perfect applicants. Job analyses prove that such perfection is required in relatively few jobs. Experience is proving to them that people even with severe impairments are among their best employees when properly prepared for work within their residual capacities.

The Rehabilitation Service joins other agencies and organizations in a continuing effort further to prove the values of judicious placement of handicapped persons not only to the handicapped persons themselves but to the employer and to the community as well.

Statistical Table

The following cumulative summary is submitted in support of the economic value of Rehabilitation. No scale has been devised for measuring the happiness and satisfaction experienced by these physically disabled people in attaining a status of self-support, nor is it possible to estimate their communities' profit in better citizenship.

TABLE 15—REHABILITATIONS, THEIR COSTS AND THEIR EARNINGS
FOR THE TWENTY-NINE YEAR PERIOD SINCE 1928, WHEN THE
EDUCATION DEPARTMENT WAS ASSIGNED THE SERVICE

FISCAL YEAR	Cost	Number Rehabilitated	Aggregate Earnings First Year	Number Active Enrollments	Number in Rehabilitation Programs

*Includes case service costs paid Woodrow Wilson Rehabilitation Center.

WOODROW WILSON REHABILITATION CENTER

The Rehabilitation Center is a facility of the State Rehabilitation Program. It is used by the Rehabilitation Service to provide opportunities for severely disabled persons to rehabilitate themselves. It offers its students: (1) guidance in the selection of an occupation in which they can become self-supporting in spite of their disabilities; (2) improvement of physical function through use of the many procedures of physical medicine including physical therapy, occupational therapy and speech therapy; (3) vocational training available by contractual arrangement in the Woodrow Wilson Technical School, by which students prepare to enter their chosen occupations; and (4) board and room, general medical attention and necessary recreational experiences essential to wholesome living away from home. At the Center post-hospital services named above and required by severely disabled people can be had concurrently and as needed. This shortens the time required for an individual to prepare himself to go to work and it reduces the cost.

The Center occupies a part of the former Woodrow Wilson Army General Hospital property declared surplus to the Federal government's needs in 1946 and acquired by the State of Virginia and the County of Augusta in 1947. The county's part of the property is used for a consolidated high school and a regional technical school.

The Rehabilitation Center's operating costs, including maintenance of buildings and equipment, are paid from fees collected for services rendered. Students and their families pay what they can. Sponsors, including the Rehabilitation

Service, pay the balance. In the year, the Rehabilitation Service paid the Center \$256,276.76 for services rendered during the year. These payments came from the State appropriation for Industrial Rehabilitation and matching Federal funds.

From the time the Center opened in November 1947 until June 30, 1956, students numbering 5,725 have been enrolled and served. There were 872 disabled students enrolled during 1956-57. In the first year of its operation the enrollment was small. At the end of this year, however, the average monthly enrollment has passed 350.

During the year appropriations from State General Funds for capital improvements and some Federal matching funds have been used to extend and improve the physical facilities of the Center. These improvements will materially increase the efficiency of operation and service to students. When completed, the capacity of the Center will be increased from 400 to 500 resident students.

SPECIAL EDUCATION

Purpose

The purpose of Special Education is to assist localities in meeting the school needs of children who have school adjustment problems resulting from physical disabilities, emotional disturbances or mental retardation.

Scope

During the 1956-57 school session 84 counties and 30 cities provided one or more special education services for children with handicapping conditions. A total of 22,964 children handicapped in varying degrees received instruction adapted to their particular needs. In addition there were 65,158 children who were served through Hearing conservation programs.

Accomplishments

In hospitals located in Arlington, Charlottesville, Norfolk, Richmond, Roanoke and at the Blue Ridge, Catawba and Piedmont Sanatoria for the tuberculous, 507 children and 407 adults had opportunities to receive academic instruction while getting medical treatment. At the Woodrow Wilson Rehabilitation Center 158 persons who were receiving rehabilitation services engaged in academic study under three teachers. A total of 20 either full-time or part-time teachers were employed in the hospitals, sanatoria, and at the Rehabilitation Center.

State financial aid was furnished on the employment of 18 teachers in special classes for children with crippling conditions. The children enrolled in these classes had opportunities to secure physical therapy, occupational therapy and speech therapy along with their regular school experiences.

The number of special classes for mentally retarded children upon which State aid was granted increased to 42 for severely retarded and 104 for those who are moderately retarded.

In seventeen school divisions 52 speech specialists were engaged in speech correction and hearing conservative programs. Reports received from these divisions reveal that through regularly scheduled speech classes instruction was given to pupils with speech defects. The speech correctionists also served as speech consultants to classroom teachers in aiding pupils with minor defects and in providing general speech improvement for all pupils.

Hearing contact classes in which severely hard-of-hearing pupils received instruction in lip reading, language development and auditory training were conducted in three divisions. Many of the pupils in need of this type of instruction were served by itinerant speech correctionists in localities where special classes did not exist.

Conservation of hearing programs were conducted in 47 school divisions in which 65,158 pupils were administered hearing tests through the use of puretone audiometers. By this method of screening 4,247 pupils were revealed as having significant hearing loss. It was reported that 1,205 of these received medical follow-up for correction. Thirty-six school divisions now own and use 52 puretone audiometers in testing hearing of school children.

In recent years there has been a steady increase in the number of homebound children who are given instruction. During the current session 1,239 were taught in their homes by 596 teachers, who for the most part were employed on a part-time basis. A high percentage of these children were confined to their homes as a result of orthopedic crippling conditions. The second largest group was composed of those who had rheumatic fever. Others were confined because of varying conditions resulting from disease, accident, or congenital deformity.

The counties and cities of Virginia expended \$1,094,515 for special education services. Reimbursement from State funds was made in the amount of \$414,747.

During the year a workshop for the in-service training of teachers was conducted. Certification requirements for teachers in all areas of special education were developed and some additional college and university courses offered for teachers.

TABLE 16—NUMBER OF EXCEPTIONAL CHILDREN
RECEIVING SPECIAL ATTENTION

	1955-56	1956-57
Crippled.....	1,004	1,356
Lowered Vitality.....	2,155	2,090
Homebound.....	1,185	1,239

Speech Defective.....	9,177	10,597
Mentally Retarded.....	2,012	2,228
Convulsive Seizures.....	296	299
Totals.....	20,243	22,964

Major Continuing Problems

While some improvement has been made in the number of facilities available for medical and psychological diagnosis of exceptional children additional services are needed. Appropriate school placement and adjustment of school programs are dependent upon accurate information as to the limitations placed upon children by their disabling conditions.

Many more school psychologists are needed in local school systems. Their services are essential in screening children for placement in classes for the mentally retarded, assisting teachers in promoting good mental health in the classroom, studying children referred to them because of indications of emotional maladjustment, and advising parents as to available resources for treatment of children who are suffering from emotional disorders.

WORLD WAR ORPHAN EDUCATION

Since 1930, the General Assembly has appropriated a sum each year for the education of World War Orphans.

To be eligible for assistance from this fund, a boy or girl must be between the ages of sixteen and twenty-five; his parent must have been a citizen of Virginia at the time of entering war service; and must have been killed in action or died from other causes in World War I extending from April 6, 1917, to July 2, 1921, or in any armed conflict subsequent to December 6, 1941, while serving in the Army, Navy, Marine Corps or Coast Guard of the United States, either of whose parents was, or is, or may hereafter become totally and permanently disabled due to such service during either such period whether such parents be now living or dead. The maximum benefit is fixed by law at \$400.00 for any one student during any one year for a total of no more than four school years. The benefits for which payments may be made are: tuition, institutional fees, board, room rent, books and supplies. In State institutions such children shall be admitted free of tuition upon the recommendation of the State Superintendent of Public Instruction.

As shown in the following table, expenditure for "tuition, institutional fees, board, room rent, books and supplies", items permitted under the law, amounted to \$9,985.00 for eligible cases receiving benefits from the fund during the year.

Number	SCHOOL OR COLLEGE ATTENDED	Cost
1	Fairfax Hall	\$ 400 00
1	Hampton Institute	400 00
3	Longwood College	1,200 00

THE VIRGINIA SCHOOL FOR THE DEAF AND THE BLIND, STAUNTON, VIRGINIA

The Virginia School for the Deaf and the Blind was established in 1839 for the purpose of educating white children who have a hearing loss or a loss of vision which handicaps them to the extent that they cannot make satisfactory progress in the public schools of the State. The school is, therefore, an auxiliary to the public school system of the Commonwealth of Virginia.

The School is supported by State appropriation so that no charge is made for tuition, board, room, laundry, books and ordinary medical attention.

The high school section of the Department for the Blind is fully accredited by the State Board of Education and the credits earned in this department are accepted by the colleges of the State.

The graduates of the Department for the Deaf are eligible for taking the entrance examinations for Gallaudet College, the only college for the deaf in the

world, and if their ranking in comparison with graduates of the other schools for the deaf in the country places them within the number that the college can accept, they are admitted for college training.

VIRGINIA STATE SCHOOL, NEWPORT NEWS, VIRGINIA

At Virginia State School it is believed that young people need the opportunity, through education, to become men and women with a broad outlook—with a sure grasp of their intellectual heritage, mentally and morally disciplined, and trained to evaluate data and events and arrive at sound decisions in all aspects of life. To this end the School emphasizes a balanced program of academic and vocational skills designed to prepare its students to make their contribution to the society in which they live at the highest level commensurate with their abilities and potentialities.

Division of Research and Planning

The Division of Research and Planning is composed of the educational services of Research, School Buildings, Pupil Transportation, Statistics and School Building Surveys which affect many phases of the entire public school program. During the year 1956-1957, the Division has undertaken through testing, study and visitation:

1. To discover and promote practices and procedures which may be used in the improvement of instruction;
2. To assist localities in planning and constructing school buildings on an efficient and economical basis which will provide for adequate curricula;
3. To aid localities in providing, developing and maintaining safe, adequate, efficient and economical transportation systems;
4. To compile and interpret statistical reports and other educational data as received from local school divisions in such manner as to be used most effectively in the continued development of the total program of public education;
5. To share with localities and advise with local school authorities in planning immediate and long-range school building programs.

During the year three regular and eight supplementary school building surveys were completed and reports made to local school authorities. Division superintendents, college professors, and members of the State Department of Education served on the committees which made the surveys. The purpose of such survey studies and reports is to assist and be helpful to division superintendents, school boards and other local groups and persons in planning over-all school building programs as needed.

The Federal Government recognized its responsibility for the impact caused by Federal activities upon local educational agencies, and the 81st Congress, 2nd Session, in September, 1950, enacted two laws to provide financial assistance to schools in federally affected areas, Public Law 874 for Operating Costs and Public Law 815 for School Building Construction Costs. During the year the Director of the Division, as representative of the State Educational Agency for this program, has given much time in working with division superintendents of schools in such affected areas and representatives of the U. S. Office of Education, through conferences and otherwise, in the preparation and approval of applications for funds and reports required under both laws. According to reports of division superintendents of schools in such federally affected areas, during the school year 1956-1957 twenty-nine counties and seventeen cities received \$7,885,714.59 under Public Law 874 for Operation, and ten counties and five cities received \$5,577,388.51 under Public Law 815 for School Building Construction. Public Law 874 was originally enacted for a period of four years from July 1, 1950, but has since been amended and extended to July 1, 1958. Public Law 815 as originally enacted expired on July 1, 1952, was later amended and extended for the school year 1953-1954, and has since been amended and extended for succeeding school years to July 1, 1958.

The reports on Research, School Buildings, and Pupil Transportation follow in the order mentioned, with statistical data given in appropriate tables.

RESEARCH

Purpose

The Research Service is organized to provide the following types of services: (1) the development and administration of State-wide testing programs and the provision of assistance with the development of comprehensive local testing programs; (2) the promotion of Conservation or Resource-Use Education; (3) the provision of assistance with the development of school building surveys; (4) the provision of assistance to graduate students who are studying problems vitally related to public education in Virginia; and (5) the preparation of selected or assigned studies.

Scope

The State-wide testing program is organized so that assistance may be provided for local school divisions in the improvement of instruction and guidance. The California Test of Mental Maturity, Intermediate S-Form, 1950 Edition, was administered during September to all seventh grade pupils; the American Council on Education Psychological Examination for High School Students, 1953 Edition, was administered in September to all tenth grade pupils; and the American Council on Education Psychological Examination for College Freshmen, 1947 Edition, was administered during the school year for the purpose of retesting high school seniors for whom retesting was requested by local school authorities. The Iowa Silent Reading Tests, Elementary Test, were administered during the last half of April to all seventh grade and eighth grade pupils. These four tests involved approximately 61,250 seventh grade pupils, 59,650 eighth grade pupils, 37,400 tenth grade pupils, and 2,100 high school seniors. Through the local testing programs sponsored by the Research Service approximately 40,865 additional pupils in twenty-three counties and cities were involved. In addition to the tests administered through the State-wide program there were approximately 119,500 tests administered to pupils in the counties and cities currently participating in the local testing programs. These local testing programs were begun during the school session, 1947-1948. Fifty-six counties and cities cooperated with the Research Service in this program during the period, 1947-1956. Six counties and one city have been permitted to re-enter the program.

The schedule below lists the counties and cities that are now in the process of cooperating for three-year periods in this program.

1954-1955—1956-1957			
Appomattox	Arlington	Buckingham	Galax
1955-1956—1957-1958			
Charlottesville	Henry	Princess Anne	Suffolk
Falls Church	Martinsville	Radford	Virginia Beach
Giles	Patrick		
1956-1957—1958-1959			
Clifton Forge	Halifax	Mecklenburg	Spotsylvania
Cumberland	Mathews	Prince Edward	Staunton
Gloucester			

Thirty counties and cities were visited during the year, many of them more than once, in connection with the development of testing programs. Many conferences in the office with individuals representing many other counties and cities have dealt with the development of local testing programs.

Approximately 39,500 tests were scored in connection with the State-wide Testing Program; 30,451 additional tests were scored at cost as a service to schools and colleges; and as a service to Secondary Education approximately 4,100 tests were scored for applicants for the Certificate of General Educational Development.

The Conservation Education Work of the Research Service involves approximately 900 Virginia Academy of Science members and perhaps an equal number of laymen in garden clubs and other voluntary organizations, in addition to the personnel of Virginia's public schools. One class studying the conservation of natural resources was taught at the Virginia Federation of Garden Clubs Camp.

The Resource-Use Workshop for Teachers held at Virginia Polytechnic Institute was addressed and several conferences held by leaders in Conservation were attended during the year.

Nine supplementary school building survey reports were prepared during the year. School building problems were studied in two other school divisions which required a brief report for one and enrollment projections for the other. Follow-up work involving school building surveys was done for several additional school divisions.

Graduate students continue to come to the Research Office for advice concerning the selection and procedures to be used in the study of real problems connected with public education in Virginia. Through this expedient both the Research Service and certain graduate students enrolled in Virginia's institutions of higher learning are being able to render more effective service to public education in Virginia.

The staff members of the Research Service work during the course of a year on a variety of diverse committees and projects. In addition to the routine work connected with standardized test administration and interpretation, school building surveys, and organized studies generally, some of the activities engaged in by one or both of the two staff members were as follows:

1. Participation in the Southern States Cooperative Program in Educational Administration—one out-of-State meeting, five days in length
2. Work with the Resource-Use Education Committee of the Virginia Academy of Science
3. Service as editor for the Education Section, Virginia Academy of Science
4. Participation as a member of the Teacher Education Committee created by the State Board of Education
5. Assistance with the development of plans for screening candidates for training as practical nurses
6. Participation in the activities of the Virginia Resource-Use Education Council
7. Participation in pre-school conferences
8. Participation in the deliberations of the Invitational Conference on Testing in New York and Princeton

9. Planning research projects with a number of committees or individuals
10. Work with a number of staff members in the Department on the development of plans and techniques for surveys and studies

Major Accomplishments

1. A study entitled, The Quality of Writing of Virginia's High School Seniors, School Session, 1953-1954, was completed and distributed to the local school divisions.
2. Enrollment projections by race and school grades were made for the State through the school session, 1962-1963.
3. A survey instrument designed for use in a study of teacher recruitment problems was developed. A report on this study will be completed in the near future.
4. Agreements were reached concerning the use of tests as one factor in the selection of students for college admission by a committee composed of college admissions officers, representatives of public high schools, and staff members of the State Department of Education.
5. A report was completed that provides summaries of the results obtained through the administration of the Iowa Silent Reading Tests, Elementary Test, and the California Test of Mental Maturity, Intermediate, to eighth grade pupils throughout the State. The report classifies the pupils as county whites, city whites, county Negroes, and city Negroes. School sessions 1949-50 through 1953-54 are included.
6. A detailed analysis has been made of the results obtained through the administration of the American Council on Education Psychological Examination, 1947 College Edition, and the Essential High School Content Battery to Virginia's High School Seniors during the school sessions, 1952-53 and 1953-54.

Major Continuing Problems

It appears that the following needs for services still constitute major and continuing problems:

1. Assistance for all instructional personnel who do not make an adequate and effective use of test results in the improvement of instruction
2. Help for educators who should use the findings of sound and appropriate research when they are appraising practices and policies and contemplating changes in the same
3. Assistance for fellow workers in education who need to make a scientific approach to the basic problems that they face
4. Help for educators in the field who could profitably use experimental studies as a way of solving many of their problems.

SCHOOL BUILDINGS

Purpose

Statute law and regulations of the State Board of Education require approval of the plans and specifications for all school building projects by the Superintendent of Public Instruction prior to awarding contracts or proceeding with the construction. Accordingly, the School Building Service is charged with the responsibility for obtaining efficient, economical, well constructed and properly located buildings including additions and major alterations with particular attention being paid to the educational and functional designs and to the health, general welfare and safety of the occupants.

This procedure necessarily requires the cooperative efforts of many individuals and groups; namely, educators, architects, engineers, private citizens, tax levying bodies, public officials, business and civic associations, special committees, national organizations, and others. The School Building Service attempts to coordinate the activities of these individuals and groups through consultation, research and dissemination of data. Because most school building programs involve relatively large sums of public funds and since most of the buildings are planned and erected to serve for a long period of years, they become, in effect monuments to those who are responsible for their planning and construction. It is most important, therefore, that the planning of school buildings be efficiently and economically handled.

Scope

The School Building Service aids in the determination of needs and the development of educational programs in collaboration with various services of the State Department of Education. It assists local school divisions, architects and others in translating educational programs and curricular trends into the physical facilities needed to carry out the programs. It reviews and clears for approval drawings and specifications in various stages of development—preliminary, semi-final and final for compliance with regulations of the State Board of Education and statute law. It performs research in education, architecture, engineering, and equipment needs. It develops factual planning material for the use of architects, school authorities and others. It renders assistance in school plant consolidation and improvement studies including selection of sites, location of buildings, alterations and additions to existing buildings, correction of structural defects, heating and ventilating problems, operation and maintenance of buildings. It keeps inventory records of the physical facilities, enrollments, capacities, costs and location of all school buildings in the State. It keeps statistical data on cost, educational and other trends.

Accomplishments

During the year complete working plans and specifications for 135 projects were cleared for approval, 30 for city systems and 105 for county systems. A number of these approved projects had to be redesigned and reprocessed because of insufficient funds, failure of bond elections or change in programs. The accompanying table shows the location of each project and a general description of the more important space facilities.

Major Continuing Problems

A comprehensive study is being made of the School Planning Manual, which has been in use since April 1, 1955, with the expectation that some simplification can be effected and in other respects it is intended to develop supplementary material and suggested layouts or floor plans of special facilities for use by architects and school administrators.

Because of the large number of projects submitted during the year and the time taken to process them for approval, it was necessary to further suspend the Operation and Maintenance Program and the development of a manual on that subject. Likewise, it has been necessary to delay studies and research dealing with cost data, relative efficiencies of equipment, finishes, design types, and the like; a revision of the School Plant Inventory system and follow-up inspections on new projects during construction and after completion.

* Laboratories and Special Classrooms:

This heading includes the following:

Science, health classrooms, agriculture classrooms, drafting rooms, beauty culture, business education, art laboratories, elementary resource rooms, elementary playgrounds.

† Auxiliary Rooms:

This heading includes the following:

Offices, clinic, guidance, storage rooms, teachers' rest rooms, student activity rooms, conference rooms.

‡ Multi-Purpose Rooms:

A—Auditorium-Gymnasium combination.

B—Auditorium-Cafeteria combination.

C—Auditorium-Gymnasium-Cafeteria combination.

D—Cafeteria with platform.

PUPIL TRANSPORTATION

Purpose

The Pupil Transportation Service assists local school officials in providing and maintaining a safe, adequate, efficient and economical transportation system in each school division.

Scope

Meetings With School Bus Drivers.—Meetings were held with school bus drivers throughout the State, in which the safe transportation of pupils were discussed. The observance of State laws, regulations of the State Board of Education, local regulations and safe driving practices were emphasized in these meetings.

School Bus Inspection.—All school buses are inspected each year by representatives of this office in addition to required monthly inspections by competent mechanics. This program is intended to insure that all buses meet all standards and requirements and are maintained in a safe operating condition at all times.

Maintenance Program and Facilities.—An adequate program of preventive maintenance is stressed as the surest means for safe and economical transportation. The importance of properly designed facilities and the necessity for good mechanics are emphasized for the efficient operation of this program. Plans and specifications for needed facilities and equipment are available to local school officials and have been used in providing many well-equipped school bus repair shops. Visits to shops, discussions of maintenance problems with mechanics and recommendations for improvements, where needed, are contributing toward an improved maintenance program.

Transportation Surveys.—Upon request, transportation surveys are made. Maps showing existing and recommended bus routes are prepared, presented and explained to local school officials. Such transportation surveys involve a careful analysis of the data obtained from the school system being studied and the making of a spot map showing where all pupils get on buses. Routes are planned so that buses operate at maximum capacity with a minimum of time and distance to the schools served.

Accomplishments

Our safety record has been good. Although more buses operated more miles during the year, the total number of accidents was considerably less than for the previous year.

During the year safety meetings were held in school divisions throughout the State. They were attended by school bus drivers, mechanics, safety patrols, superintendents, law enforcement agents and others.

There was an increase of 177 buses in operation, of 17,951 pupils transported, and of 1,649,513 miles traveled in the transportation of pupils.

From these figures and those given in the table below for the past five years, it will be noted that the number of children transported is increasing at a more rapid rate than the number of buses in operation, a condition which is partially explained by the use of larger buses.

YEAR	Number Pupils Trans- ported	Number Buses	Number Miles	Average Number Pupils Per Bus Per Day	Average Number Miles Per Bus Per Day	Cost Per Pupil	Cost Per Mile	Cost of Operation Less Gas Tax Refund
1952-53 . . .	301,830	3,351	29,651,327	90	49	\$ 19 26	\$.196	\$5,812,295 17
1953-54 . . .	325,481	3,569	31,400,559	91	49	19 30	201	6,281,922 83
1954-55 . . .	347,369	3,750	32,906,599	93	49	18 77	198	6,519,415 57
1955-56 . . .	358,406	3,912	34,182,528	92	49	19 04	199	6,824,973 92
1956-57 . . .	376,357	4,089	35,832,041	92	49	19 45	204	7,318,884 77

During the year 22 transportation survey maps were made, many of which have been partially or wholly adopted and put in operation as recommended.

More than 42 school divisions lowered their per unit cost of operation and 19 of this number reduced their total net cost of operation for the year. This may be attributed largely to improved maintenance programs and better planned bus routes.

The number of buses, classified according to type of ownership and operation, can be seen from the following table.

YEAR	Number of Publicly Owned Buses	Number of Privately Owned Buses
1952-53	2,707	644
1953-54	2,915	654
1954-55	3,163	587
1955-56	3,391	521
1956-57	3,609	480

Major Continuing Problems

The preservation and improvement of our pupil transportation safety record.

An expansion of maintenance facilities to include school divisions not having such at present and to improve those provided on a temporary and inadequate basis in some other divisions.

To advise and assist local school officials in the public ownership and operation of all school buses in their pupil transportation systems.

To assist local school officials in more efficient planning and operation to provide safer pupil transportation and to reduce over-all operating costs.

Teacher Education and Certification

Responsibilities of the Office:

- I. Certification of teachers in Virginia.—This includes the preparation and revision of State certification regulations; the issuing of new certificates and the renewing of certificates.
- II. Scholarship loans.—This office administers the plan for granting scholarship loans (which can be cancelled by teaching) to Virginia students who are preparing in Virginia colleges to become teachers and to teachers who study in summer school sessions at Virginia colleges for the purpose of improving their certificates.
- III. The Teacher Education Director, Supervisor and Assistant Supervisor of Teacher Education serve as liaison officers of the State Board of Education in performing various services for the colleges, including their accreditation.

Teacher Shortage.—In 1956-57 there were 1,348 teachers who were employed on Local Permits and 1,257 teachers who were employed on Emergency Teachers Licenses, a total of 2,605.

TABLE 19—NUMBER OF TEACHERS EMPLOYED WHO DID NOT QUALIFY FOR REGULAR CERTIFICATES

	1945-46	1947-48	1949-50	1951-52	1952-53	1953-54	1954-55	1955-56	1956-57

Total	2,915	3,220	2,880	2,551	2,545	2,683	2,400	2,471	2,605

State Scholarships.—The General Assembly in 1956 made an appropriation which permitted the allocation of \$575,000 to scholarships for the year 1956-57 and \$658,000 for the year 1957-58.

The following table shows the scholarship loans which have been granted to college students while preparing to teach and to Virginia public school teachers who have gone to summer school to improve their certification status:

TABLE 20—NUMBER OF STATE SCHOLARSHIPS PAID TO STUDENTS AND TO TEACHERS

	Prior to 1951-52	1951-52 Summer 1951	1952-53 Summer 1952	1953-54 Summer 1953	1954-55 Summer 1954	1955-56 Summer 1955	1956-57 Summer 1956	Total

Teachers—summer school...	2,360	1,200	1,123	1,100	1,015	980	812	8,590

Teachers' Salaries.—The mean or average of the salaries for teachers shows an increase. This is small when compared with the very substantial increases made for 1952-53, but it maintains the encouraging trend upward.

TABLE 21—AVERAGE SALARIES OF TEACHERS IN VIRGINIA
PUBLIC SCHOOLS—1950-51—1956-57

	1950-51	1951-52	1952-53	1953-54	1954-55	1955-56	1956-57

Modification in Regulations.—The Superintendent's Annual Report for 1953-54 described action taken by the State Board of Education with respect to Normal Professional Certificates which made it possible for teachers who had secured corresponding certificates in other states before 1942 to secure Virginia Normal Professional Certificates. This placed teachers from other states on the same basis as those in Virginia with similar preparation. On August 2, 1954, the Board authorized a resumption of the practice of permitting Virginia teachers who had taught at least five years on Elementary Certificates or Elementary Professional Certificates to revive them after expiration.

It should be noted that neither of these actions represented any lowering of the standards established for the certificates now issued.

TABLE 40—CONSOLIDATED AND ADJUSTED STATEMENT OF
SCHOOL FUNDS—1956-1957—CONTINUED

PERCENTAGE DISTRIBUTION OF COSTS

	State	Federal	Local
1. Expenditures on State Level.....	76 79' ^c	23 21' ^c	.
2. Expenditures on Local Level:			
(a) Total Expenditures on Local Level including Capital Out- lay and Debt Service.....	30 78' ^c	8 45' ^c	60 77' ^c
(b) Total Operation Costs Only.....	39 69' ^c	7 43' ^c	52 88' ^c
(c) Instruction.....	44 42' ^c	5 58' ^c	55 5' ^c
(d) Capital Outlay.....	3 80' ^c	15 27' ^c	80 81' ^c
(e) Debt Service.....			100 00' ^c
(f) Operation Costs, other than Instruction.....	27 85' ^c	25 00' ^c	46 15' ^c
3. Total Expenditures—State and Local Levels including Capital Outlay and Debt Service.....	31 75' ^c	8 76' ^c	59 49' ^c

*Federal funds cannot be apportioned to various classes of expenditure and therefore such Federal funds as may be used for teachers salaries are reported as a part of local funds.

Note: The above tabulation does not include expenditures on account of the Veterans Training Program.

TABLE 40—CONTINUED
TOTAL EXPENDITURES FOR PUBLIC FREE SCHOOLS IN
VIRGINIA BY SOURCE*—1956-1957

(State and Local Level)

\$201,707,738.42

*Not including Federal funds in the amount of \$100,602.18 for the veterans training classes operated under contract with the Veterans Administration.
